# Product Description

Akkadian Provisioning Manager™ simplifies the process of provisioning across all the major Cisco Unified Communication applications. From a single pane of glass, provision users in Cisco Unified Communications Manager, Unity Connection, Contact Center Express, WebEx and more.

Leverage fully automated provisioning with Active Directory or integrate to existing application using the API. Use Bulk Provisioning to help with large projects or Report Manager to report on or modify existing data. Offload provisioning task to users with the Self-Care Portal and manage devices using Phone Control.

## Video Release Notes

View our video release notes to witness some of the great new features in Provisioning Manager 4.14. Please review the written release notes for important information regarding the upgrade process as well as other important information.

# Release – 4.14.12

---

Release 4.14.10 is a maintenance release for Provisioning Manager 4.14. Please see the release notes for version 4.14.06 for the initial Provisioning Manager 4.14 release information.

Provisioning Manager 4.14.12 only supports direct upgrades from versions 4.11.02 and above.

Please review the upgrade notes in 4.14.06 before upgrading Provisioning Manager.

# Fixes

---

PME-4192 – GV and UDV for Device Name in Spark Remote Device not working

PME-4250 – Spark Remote Device template without CSS configured throws and error

PME-4233 – Product Specific Configuration fields are not showing correctly for some phones
