Akkadian Provisioning Manager Release Notes

4.14.16 — Last update: 2019/03/01

Table of Contents

Product Description

Akkadian Provisioning Manager™ simplifies the process of provisioning across all the major Cisco Unified Communication applications. From a single pane of glass, provision users in Cisco Unified Communications Manager, Unity Connection, Contact Center Express, WebEx and more.

Leverage fully automated provisioning with Active Directory or integrate to existing application using the API. Use Bulk Provisioning to help with large projects or Report Manager to report on or modify existing data. Offload provisioning task to users with the Self-Care Portal and manage devices using Phone Control.
