# Release – 4.14.18

---

Release 4.14.18 is a maintenance release for Provisioning Manager 4.14. Please see the [release notes for version 4.14.06](#) for the initial Provisioning Manager 4.14 release information.

Provisioning Manager 4.14.18 only supports direct upgrades from versions 4.11.02 and above.

Please review the upgrade notes in 4.14.06 before upgrading Provisioning Manager.

# New Features

---

**PME-4036** – Add support for provisioning Call Pickup Groups

**PME-4264** – End User LDAP External Search

**PME-4275** – Add ability for Self-Provisioning phone service to use DN

**PME-4297** – Automation – Add support for pushing number to Active Directory

**PME-4298** – Automation – Add support for using Global System Variables

**PME-4299** – Global Variables – Add support for left / right trim & regex

## Example Regular Expression:

Rule = Allow only letters and create CIPC with first initial followed by last name

CIPC{{{<<^[a-zA-Z]{1}>>First Name}}} {{{Last Name}}}

## Example use of Trim:

Trim the first 4 digits from Line1 Global Variable

{{<<4>>Line1}} – {{{First Name}}} {{{Last Name}}}

Trim can be applied in the beginning or end of the Global Variable

**PME-4314** – Add support for Global Variables in the Device Name field for phones

**PME-4329** – Phone Control – Add support for running bulk macros and background updates

**PME-4331** – Upgrade Process: Add support for a pre-upgrade patch notification.

**PME-4417** – Cross cluster “Home Cluster Validation” – validate if end user has Home Cluster enabled on another CUCM cluster

# Improvements

---

- PME-4315** – Add support for filtering device types in self-care portal
- PME-4322** – Phone Swap – Add the ability to delete the destination orphaned line when using phone swap
- PME-4328** – Add support for supporting multiple LDAP agreements for DN push to Active Directory
- PME-4330** – End User – Ability to disable Home Cluster setting in template
- PME-4337** – Add error trapping for Unity user deletion
- PME-4338** – Add email field to auto-delete settings
- PME-4341** – “Deletion” of LDAP user should uncheck ‘Home Cluster’ field
- PME-4345** – Auto Offboarding – Uncheck Home Cluster setting as part of LDAP user off-board
- PME-4348** – Add DN Pool functionality to Hunt Pilot
- PME-4359** – Rename Spark to WebEx Teams
- PME-4360** – Rename WebEx to WebEx Meetings
- PME-4391** – Ability to exclude server origin in email content
- PME-4347** – Auto-provision – Ability to clear users from database that were previously auto provisioned

# Fixes

---

- PME-4284** – Device Security Profile field not populating with Universal Device Template Types
- PME-4351** – Shared Lines are being deleted when Auto-Offboarding a user
- PME-4398** – GV “Description” causes error with phone swap
- PME-4164** – LDAP Add/edit – Kohana Error when putting non-numeric characters in the Port field.
- PME-4249** – Fields not populated when provisioning Analog Devices
- PME-4340** – Error Exception displayed after restoring data from backup file
- PME-4393** – Self-service not supporting multiple logos
- PME-4402** – Setting background on 8851 changes background, despite throwing an error
- PME-4405** – Specifying ‘DN Pool Name’ does not automatically assign DN from selected pool
- PME-4406** – ‘System > Email Template’ – Right-click insert Global Variable selects wrong Global Variable
- PME-4053** – Auto assigned DN will not populate System global variable in Bulk.
- PME-4342** – Provision Validation – When enduser is used twice in a provision job
- PME-4395** – Fix double replacement of value for SGVs using
- PME-4159** – CSF Jabber Client Primary phone not being set
- PME-4339** – Reporting page not showing full Job name with colon character in the job name
- PME-4343** – Cannot edit translation pattern with filter template applied
- PME-4350** – Self Service ID GV bug with Email Templates when sending email
- PME-4370** – System Global Variable won’t populate Directory URI field in Line Template
- PME-4382** – Primary and IPCC Extension not showing existing settings with Edit User Template
- PME-4386** – Device Swap not applying Application user associated with selected template
- PME-4387** – PM – 4.14.16 – not showing UDP under Reporting or View Details
- PME-4396** – Bulk Swap error with Device Template Names that only have numbers
- PME-4400** – Filter Template issue with Unity (users with ‘\_’ character in alias)
- PME-4403** – Jabber Device Template – Logged into Hunt Group is setting is not applying
- PME-4408** – Improve synchronization process when one or more clusters fails to sync
- PME-4411** – PM – Edit Phone – Enable Logged Out (Default) Profile Information – when set to “blank” does not seem to take the setting.
- PME-4416** – IPCC “Automatic Available” field being set to disabled
- PME-4418** – Self Service Portal hangs on “One moment please.....” on Single Number Reach page
