Table to record documentation links

Documentation links can be maintained via the following transaction:

/BTI/MDE_C_DOCU

Initially the URL are added by class and subclass i.e. ISU_BPEM and Z006 (case category)

The screenshot shows the SAP transaction 'MDE: Configure Documentation link at Class, Sub-class level'. The top bar includes the SAP logo and the text 'New Entries: Details of Added Entries'. Below the top bar is a toolbar with icons for saving, deleting, and other actions. The main area contains two input fields: 'Class' and 'Subclass'. Below these is a table with four rows, each representing a part of the URL (URL, URL part 2, URL part 3, URL part 4). The 'URL' field is currently empty.

If the URL exceeds the size of the first box, you can add the remaining section of the URL in the URL part2/ 3/4 fields.

The screenshot shows the same SAP transaction, but with data entered. The 'Class' field is 'ISU_BPEM' and the 'Subclass' field is 'BQR1'. The 'URL' field contains the text 'http://basisweb/en-ca/departments/es/sites/sapprocedures/Working%20Documents/CA-100-30'. The 'URL part 2' field contains the text 'justMents%20Transferred%20History%20-%20Doubtful%20Debt.docx'. The 'URL part 3' and 'URL part 4' fields are empty.
