1. Introduction

The SLSA Operations app is a paperless patrol management suite produced by Surf Life Saving Australia for use by active surf lifesaving patrol members. The latest feature rich version is location based and uses your current location for weather details, rescue locations, tracking of roving patrols and assets and much more. Use the 'Activity feed' tab to see what is happening around your club/service for the current day. Push notifications will alert you when it's time to sign off. Use the Gear and Issues modules to perform gear inspections, view your clubs equipment and report gear issues. Powercraft Logs can be filled out within the Operations App using the 'Powercraft' option in the main menu

Depending on your user access below is a list of possible Operation App menu items.

2. Preparation for Using the App

Clubs, Lifeguard Services and Support Services

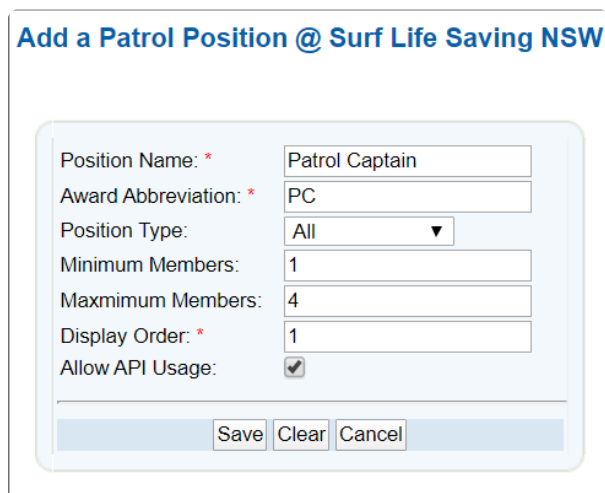

Clubs, Lifeguards and Support Services need to ensure the following is entered in Surfguard prior to using App

- Patrol Teams are created (Individual teams for some Support Services)
- Patrol Rosters are created

State Centre

Update Patrol Positions in Surfguard to enable members in specific patrol positions to access the Operations App. To update positions in Surfguard:-

- Click Patrols > Setup Patrol Positions > Setup Patrol Positions
- Select Edit for the Patrol Position you want to enable access
- Tick the box Allow API Usage

Add a Patrol Position @ Surf Life Saving NSW

Position Name: *	Patrol Captain
Award Abbreviation: *	PC
Position Type:	All ▼
Minimum Members:	1
Maximum Members:	4
Display Order: *	1
Allow API Usage:	<input checked="" type="checkbox"/>

Save Clear Cancel

Members

Need to have a Members Area account <https://members.sls.com.au>

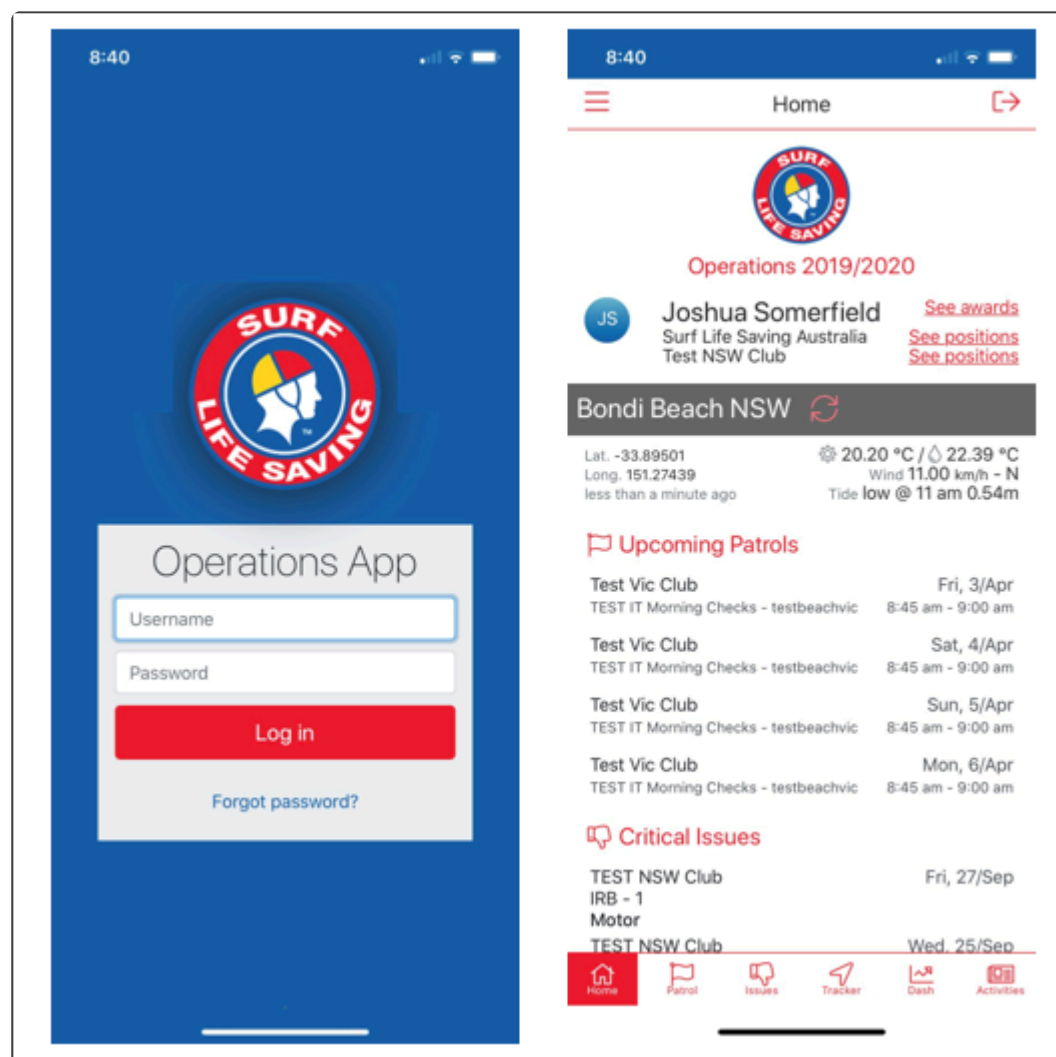

- Downloaded the SLSA Operations App from the Apple App Store or Google Play Store
- There are three ways members can access the SLSA Operations App
 1. iPhone/iPad
 2. Android phone/tablet
 3. SLSA Operations WebApp: <https://operations.sls.com.au>

2.1 Home Screen

Enter your Members Area account login details and click 'Log in'. When using the app on your own phone, you will not need to logout, the app will remember your login details and simply refresh every time you open the app.

Once logged in

- The Home Page shows users their location, weather, awards and officer positions.
- Display 4 most recent upcoming patrols.
- Any critical Gear and Equipment issues will also be listed on the home page.

3. My Patrols

 **Note:** Clicking on the Flag Icon (Patrols) shows users the Patrols rostered on for Today, use the Upcoming and Archived options to view previous/upcoming rosters

The Patrol Functions allows authorised members to:

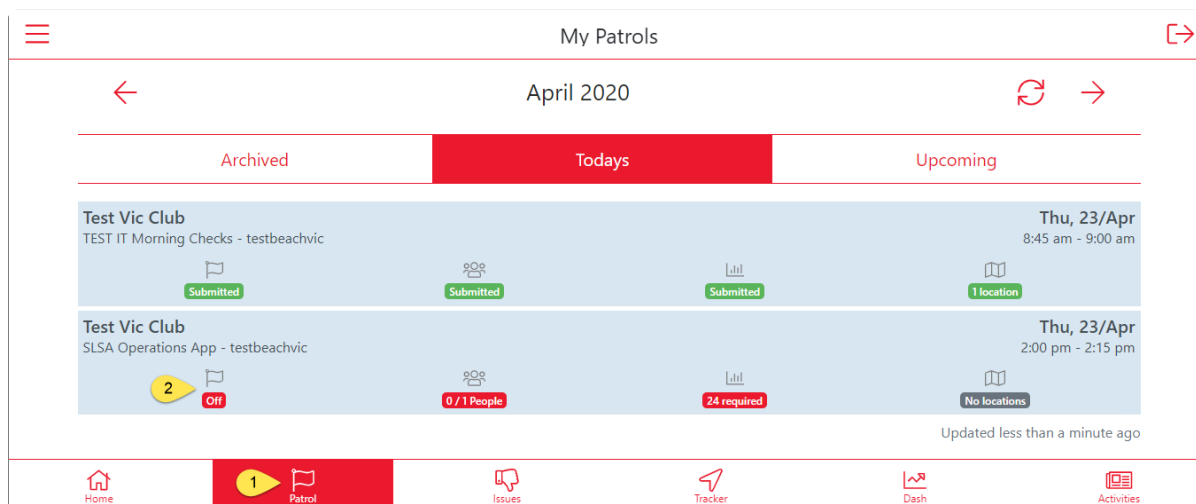

- Sign on, update status and sign off their patrol/lifeguard service/Support Service.
- Update patrol rosters/members
- Update Patrol Statistics
- Record patrol and location based information such as your patrols location, beach hazards and rescue locations

3.1 Signing On Patrol and Updating Status

 To sign on a patrol see instructions below
Note: Sign On becomes active 2 hours before a patrol is scheduled to start

1. Select the 'Patrols' icon and then select the flag icon which will display as 'Off' for the patrol that you wish to sign on.
2. Selecting the Patrol Flag will take you to Patrol Status screen.

Use the arrow key at the top of the screen (next to Patrol Status) to return to the main menu.

3. The Patrol Status screen displays and there are compulsory fields that must be completed. Use the drop-downs to access a list of options for each strength/status. The app will also display the number of patrolling members rostered to the patrol. Users can adjust this number to reflect the number of patrolling members currently on patrol at sign on.

5. A photo of the beach can be uploaded by clicking on the camera icon, any additional notes can be added.

6 Once all compulsory fields have been completed select 'Sign On'
A pop-up will display asking you to confirm you want to sign the service on.
To return to the main menu – click on the arrow located at top of screen.

Updating Patrol Status During Patrol

1. Select the Patrol flag icon down the bottom of the page.
2. Select the Patrol flag which will be displayed as 'On' (for the patrol that you wish to update) and you will be directed to the Patrol Status menu.

To view a quick instructional video outlining this process see below:

3.2 Patrol Statistics

Within the My Patrol Section users are requested to set a minimum subset of patrol statistics. These stats are compulsory when signing on/off a patrol such as Weather Conditions and these are indicated to the user in the statistic screen. Users can update a wide variety of patrol statistics as they occur during the patrol.

Weather Conditions stats are required to be completed at the 'Start, Middle and Finish' of each patrol.

Statistics include:

- Weather Conditions – data can be pre-filled in some fields using the feed from BOM for the given beach.
NOTE: Clicking on the red 'Auto' button will prefill this information.
- Real-time Hazards
- Other – number of incidents
- Beach Closure Reason
- Beach Attendance
- Rescues
- First Aid Summary
- Preventative Actions
- Gear & Equipment

Once you have opened your patrol, click on the Stats icon (third on the patrol status menu tab) to access the Patrol Statistics.

To view a quick instructional video outlining this process see below:

3.3 Patrol Rosters

Accessing the Patrol Roster and Marking Attendance

1. Select the 'Patrol' button located on the bottom of the page.
2. Select the Roster which will display the number of people rostered in the patrol.

3. The roster has a checkbox next to each member who is rostered on the patrol.
4. Tick to indicate that a person is attending patrol as each member will be set as unchecked by default.

1 / 1	Name	Roster
<input checked="" type="checkbox"/>	Joshua Somerfield Patrol Captain	Rostered 9:00 am 9:15 am

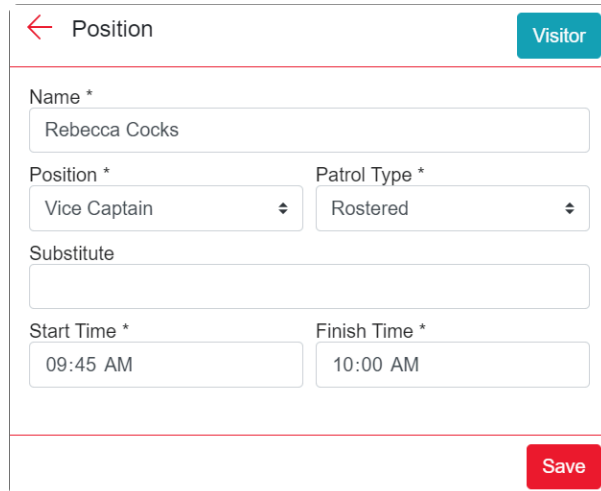

Adding Additional Members and Updating Information

Additional members can be added to the patrol by clicking on the red 'Add Position' button. If a member is left as unchecked then they will display as a 'no-show' in the patrol log in SurfGuard.

3 / 3	Name	Roster
<input checked="" type="checkbox"/>	Rebecca Cocks Vice Captain	Rostered 9:45 am 10:00 am
<input checked="" type="checkbox"/>	Yvette Rutherford IRB Driver	Rostered 9:45 am 10:00 am
<input checked="" type="checkbox"/>	test female Patrol Captain	Rostered 9:45 am 10:00 am

Members on patrol can be updated and have their information changed accordingly to account for Volunteer Patrols, Substitutions, Not Rostered/Excused, arriving late or leaving early this can be done by clicking on a patrol member's 'Edit' button.

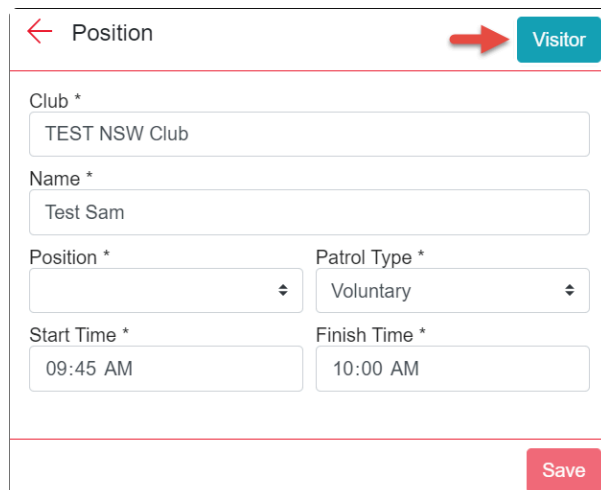

Authorised users can update patrolling members starting and finishing times indicate substitution requirements.

The screenshot shows a mobile app interface for editing a patrol member. At the top, there is a back arrow and the title 'Position'. To the right of the title is a blue button labeled 'Visitor'. The form contains several fields: 'Name *' with the value 'Rebecca Cocks', 'Position *' with a dropdown menu showing 'Vice Captain', 'Patrol Type *' with a dropdown menu showing 'Rostered', 'Substitute' (empty), 'Start Time *' with the value '09:45 AM', and 'Finish Time *' with the value '10:00 AM'. At the bottom right is a red 'Save' button.

Adding a Visitor to a Patrol

Visitors from other clubs/lifeguards can be added by using the 'Add Position' button. Type in the Visitors name and select save once required fields have been filled in.

The screenshot shows the same 'Position' form, but with a red arrow pointing to the 'Visitor' button. The form fields are: 'Club *' with the value 'TEST NSW Club', 'Name *' with the value 'Test Sam', 'Position *' with an empty dropdown menu, 'Patrol Type *' with a dropdown menu showing 'Voluntary', 'Start Time *' with the value '09:45 AM', and 'Finish Time *' with the value '10:00 AM'. The red 'Save' button is at the bottom right.

To view a quick instructional video outlining this process see below:

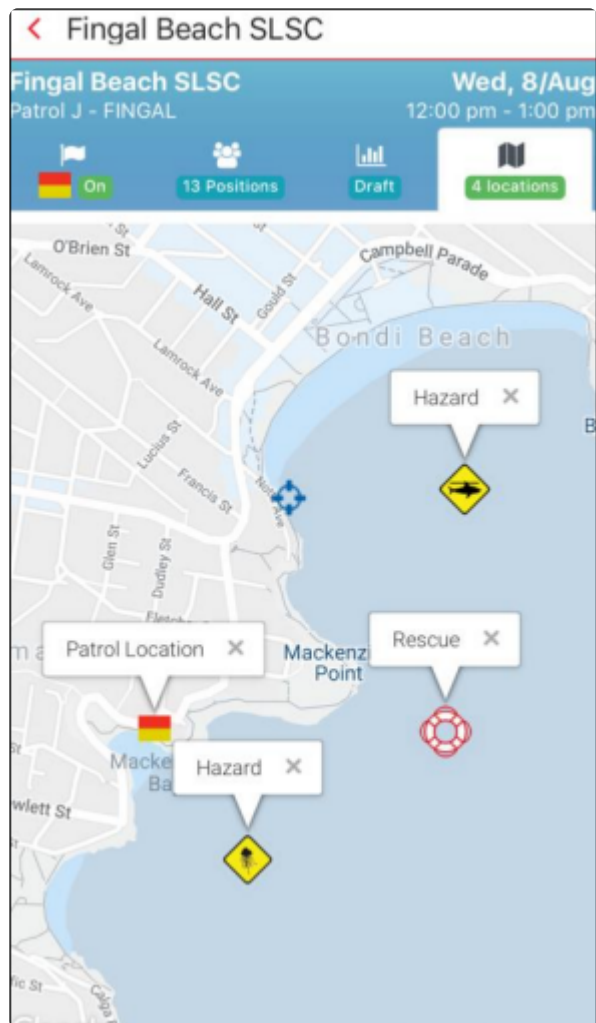

3.4 Patrol Locations

A new tab to view any location-based information on your patrol such as:

- Patrol locations
- Beach Photos
- Hazards
- Rescue

Location-based information will show in this tab as soon as they are added into the app. For example, when you add a new rescue and specify it's location, this will appear. All location-based data will be available in real-time for your Surfcom operations centre to see.

Public information such as patrol location, photos of the conditions and hazards (NOT Rescues) will be shown on the [Beachsafe Website](#) for your beach.

3.5 Signing Off – Patrol Status

 **Note:** Users will receive a Push Notification to remind them to sign off their patrol, via the Operations app, 30 minutes prior to the end of their rostered patrol. If you wish to keep your beach open and patrol for longer, simply continue to use the 'Update' button in the Status tab, then 'Sign Off' when ready.

1. Sign Off can only be done 1 hour prior to the end of the patrol. A reminder to sign off will pop-up 30 minutes prior to the end of patrol.
2. A 'sign off checklist' is provided to indicate to the user that they have updated the required roster and statistic data as required.

Sign Off Checklist

- ✓ Statistics
- ✓ Roster
- ✓ Status

Sign Off

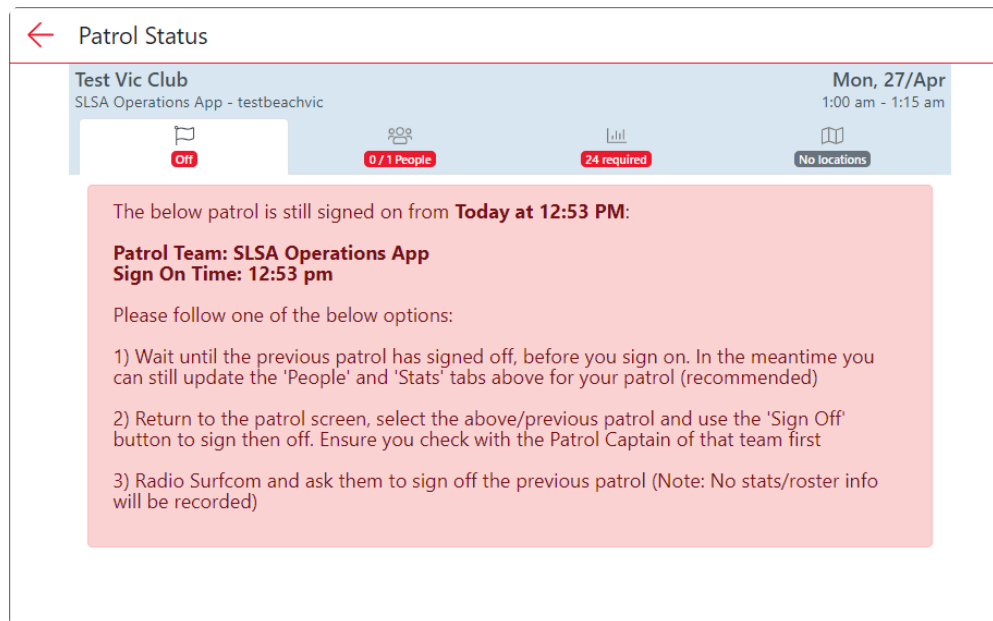

3. When a user selects the 'Sign off' button it asks, 'are you sure you want to sign off?' if they select yes then this is updated in Surfcom and the application displays a confirmation page and the sign off time. All data is marked as 'submitted' and can be viewed but no longer edited.

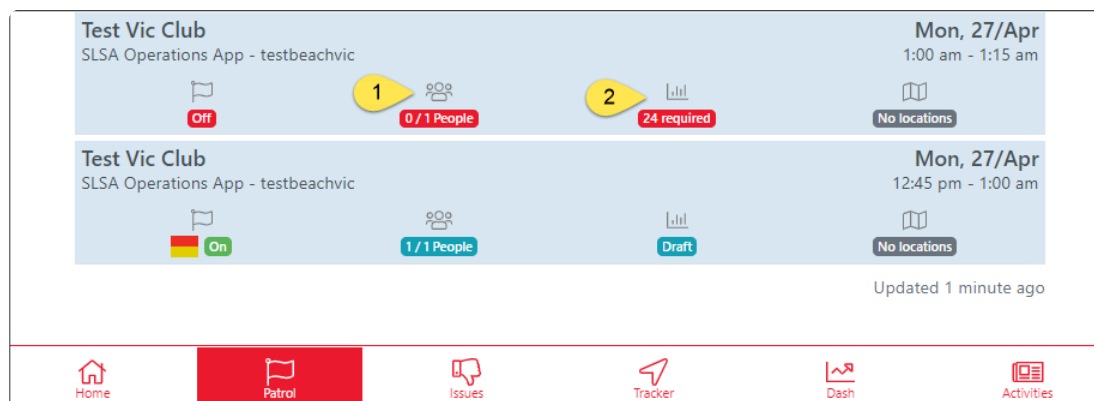

4. The Patrol Log is created in Surfguard containing the member's roster information and statistics. At this time an email confirmation is sent to the Patrol Captain/Vice Captain (or other positions as designated by each state centre) containing a link to the PDF version of the Patrol log, this enables the Patrol Captain/Vice Captain to check that all the data entered into the log is correct. If the data is not correct the Patrol Captain will be required to contact the Club Administrator.

To view a quick instructional video outlining this process see below:

3.6 Shift Change / Patrol Handover

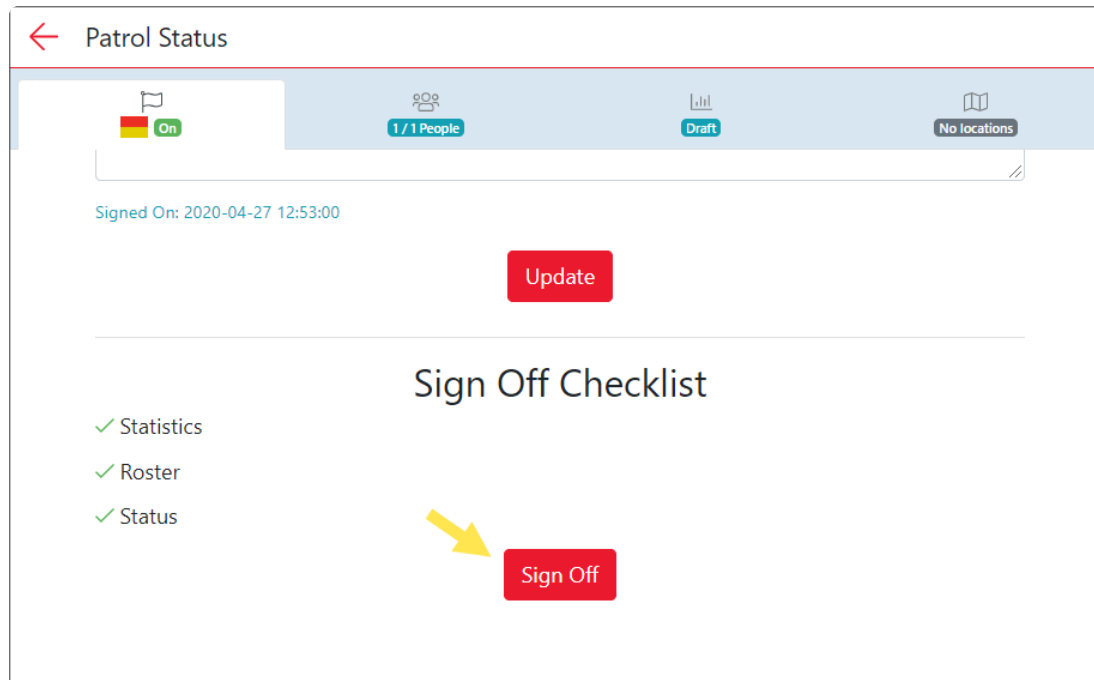

1. Wait until the previous patrol has been signed off, before you sign on. In the meantime you can still update the 'People' and 'Stats' tabs above for your patrol.

2. Return to the patrol screen, select the above/previous patrol and use the 'Sign Off' button to sign off the patrol.

Note: Ensure you check with the Patrol Captain of that team first.

3. Radio Surfcom and ask them to sign off the previous patrol

Note: This should be used as a last resort as no Stats or Roster information will be recorded in SurfGuard.

To view a quick instructional video outlining this process see below:

3.7 Viewing Archived Data

To view the archived patrol data access the patrols section and make sure 'Archived' is selected. Click on any of the Submitted data to view the archived data.

3.8 FAQ's

How Can I Access the Operations App?

An internet connection is required to use the App. Download the App on your own smart device from the App or GooglePlay Store. You can also access it on your computer, tablet or phone

<https://operations.sls.com.au> A poor internet connection will cause speed issues when using the App..

Who Can Use the App?

All members can use their Members Area login to access the Operations App, however, only certain patrol positions have full edit access to the App. If you are the position of Patrol Captain or Vice-Captain you have full edit access to all patrols at your club. If you are the Patrol Application Captain (NSW Clubs Only) or similar name in other States you have full access ONLY for the patrol you are rostered for at the club.

Sign On & Sign Off Procedures For Morning & Afternoon Patrols

If you have an AM patrol and a PM patrol, the AM patrol MUST sign on and off and then the PM patrol MUST sign on and off.

If the AM patrol forgets to sign off the PM patrol can do a forced sign off in the App however this will stop the patrol log being created in Surfguard.

Please **DO NOT** let Surfcom sign you off if you have signed on with the App. If Surfcom does sign off the patrol, the log does not automatically get created in Surfguard. The log does stay in the App but you then have to manually enter the information from the App to the Surfguard patrol log.

How Do I Access Data from Previous Patrols?

Login to the App and click the Flag symbol at the bottom of the screen and click Archived. You can then arrow back to previous months of patrol logs.

4. Activity Feed

The activity feed allows users to view the status and activity information of services around them. This is a direct real-time feed from Surfcom and only contains 'non-sensitive' information.

Click on the Activity icon (bottom of the screen) to view activity information. Use the 10km, 20km and 50km filter options to only see the activity of services close to your current location.

5. Dashboard

Use the dash icon in the bottom menu to see your clubs real-time attendance graph (People on the beach, in water, on craft etc).

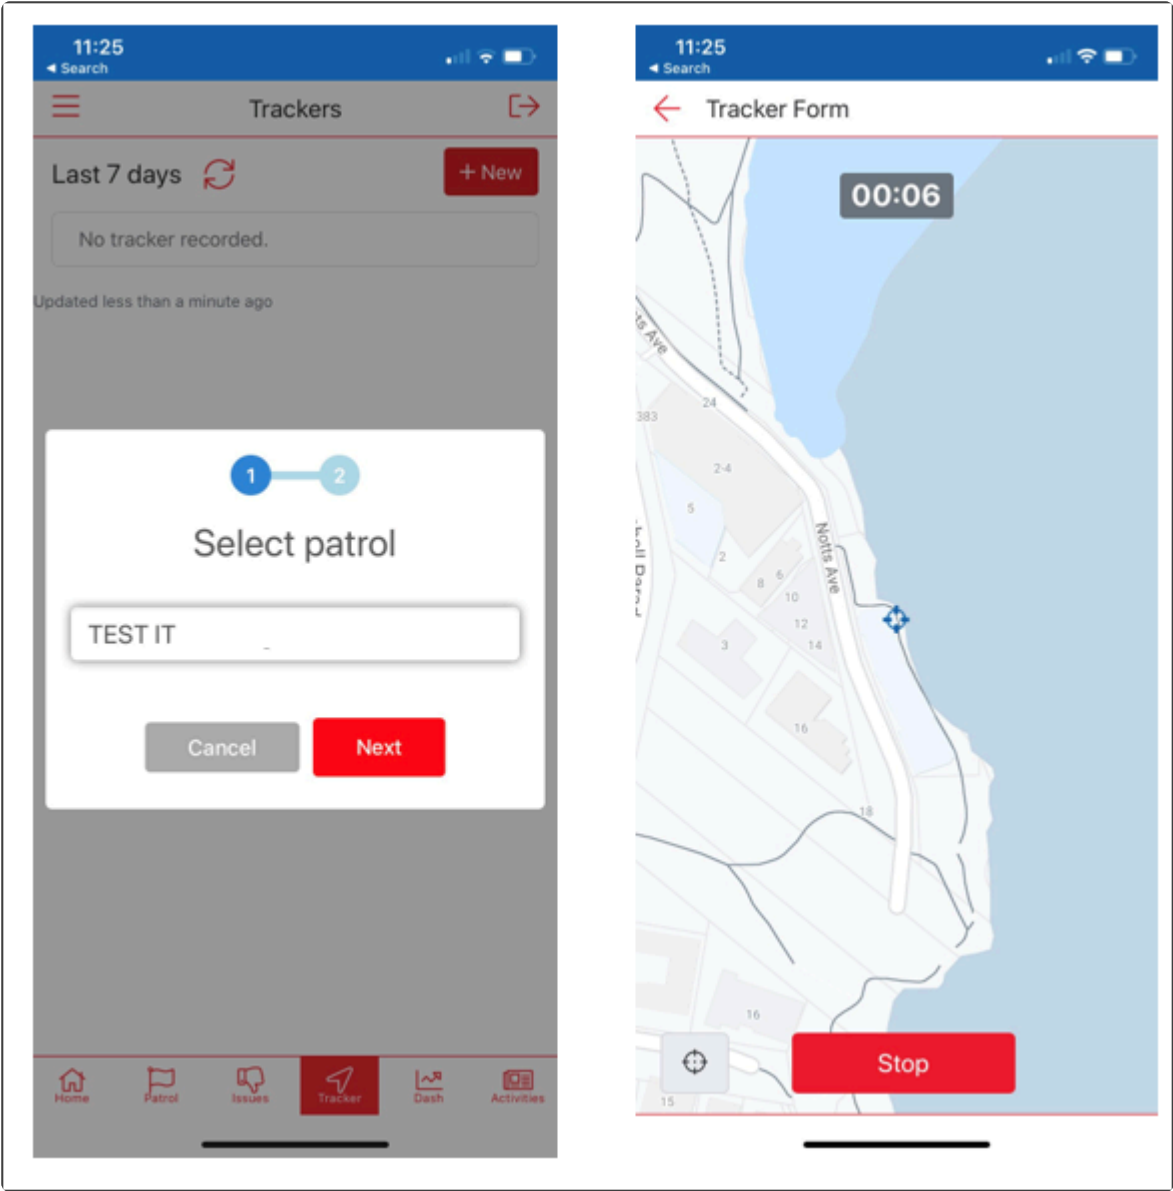

6. Patrol Tracker

By clicking on the Tracker Icon (Located bottom mid-screen) users can view the last 7 days of tracks for patrol team people, vehicles, IRB etc that have been activated. Upon opening up a tracker, users can see the route taken by their services.

Users can also instigate a new track by selecting the New Button. Select the appropriate Patrol Team and Patrol Type that you wish to Track ie: Vehicle, IRB, ATV, Boat or Person. Allow the Motion and Fitness function and click the 'Start' button for the Operations App to commence live tracking of the User. The Live Tracker sends all location information back to Surfcom and a Surfcom operator can view a map with the location detail on it. The countdown will continue to run in the background if the Patrol Ops app is minimised.

7. Issues

1. Use the 'Issues' section to log any issues against gear and equipment in the club. An issue can be created, photos can be attached, comments can be made

8. Gear

Accessing the Gear and Equipment Section

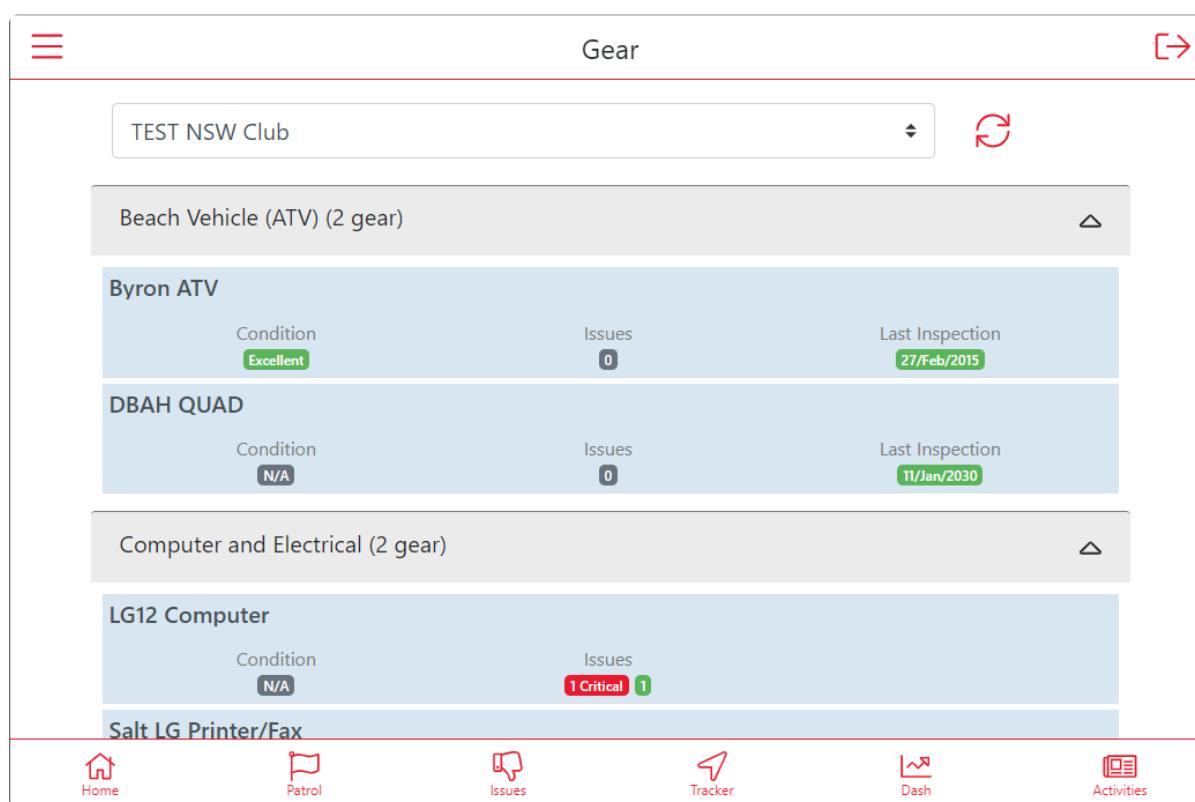

Viewing Gear and Equipment

All users will have basic view access to the gear in their club(s)

The default display is to show all categories.

- You can use the Arrow Up/Arrow Down icons to display all the items in each category.
- Once you open a Gear Category you will see if any issues have been added to gear in that category.

8.1 Gear Inspections

Note: To conduct a gear inspection you need to have been awarded the Gear and Equipment Auditor

Award in SurfGuard, contact your State Lifesaving Manager who can coordinate the allocation of the award with the SLSA Helpdesk.

There are three variations of this Award

- Gear and Equipment Auditor (State Endorsed)
- Gear and Equipment Auditor (Branch Endorsed)
- Gear and Equipment Auditor (Club Endorsed)

Depending on the Award assigned and the originating organisation, this will determine what access you will have to perform gear inspections.

For example, if a user has the Branch Award assigned and the originating organisation as Central Coast Branch, they will have access to perform gear inspections for all relevant gear in Central Coast Branch and all the clubs/organisations within the branch.

Conducting a Gear Inspection

To perform a gear inspection, follow the following steps

1. Click in the Last Inspection area
2. Click +New

← Gear Inspections

You will then be prompted to do your Pre-Check, you can complete this by clicking on the red X underneath 'Pre Check'

Complete each Pre-Check as required by clicking on the PASS button for each pre-check that has been performed for your IRB.

Click '**SAVE**'.

You will then be prompted to select an IRB Motor, make your selection and click Done and continue with the Motor Pre-Check.

Once you have completed the Powercraft Status, Members and Gear Sections you will be prompted to change the log from **Draft** to **Open**.

A message will appear '*All minimum requirements met. You can now change the log status to OPEN*'.

Click '**Change**' and the system will automatically update your log to the status of Open.

If you wish to take a photo and add this to your powercraft log go to the Status section and at the bottom of the form and there will be a camera icon.

Click on the camera icon to take picture (ie: picture of the conditions or the IRB Gear).

You can add a comment via the Status Page.

If you wish to email an Excel or PDF version of your powercraft log to your email address (email address that is attached to your Surfguard Membership File, go to the Status section. At the bottom of the form there is a red **SEND** button. Click the Send button.

10. Surf Risk Rating

The Surf Risk Rating tool

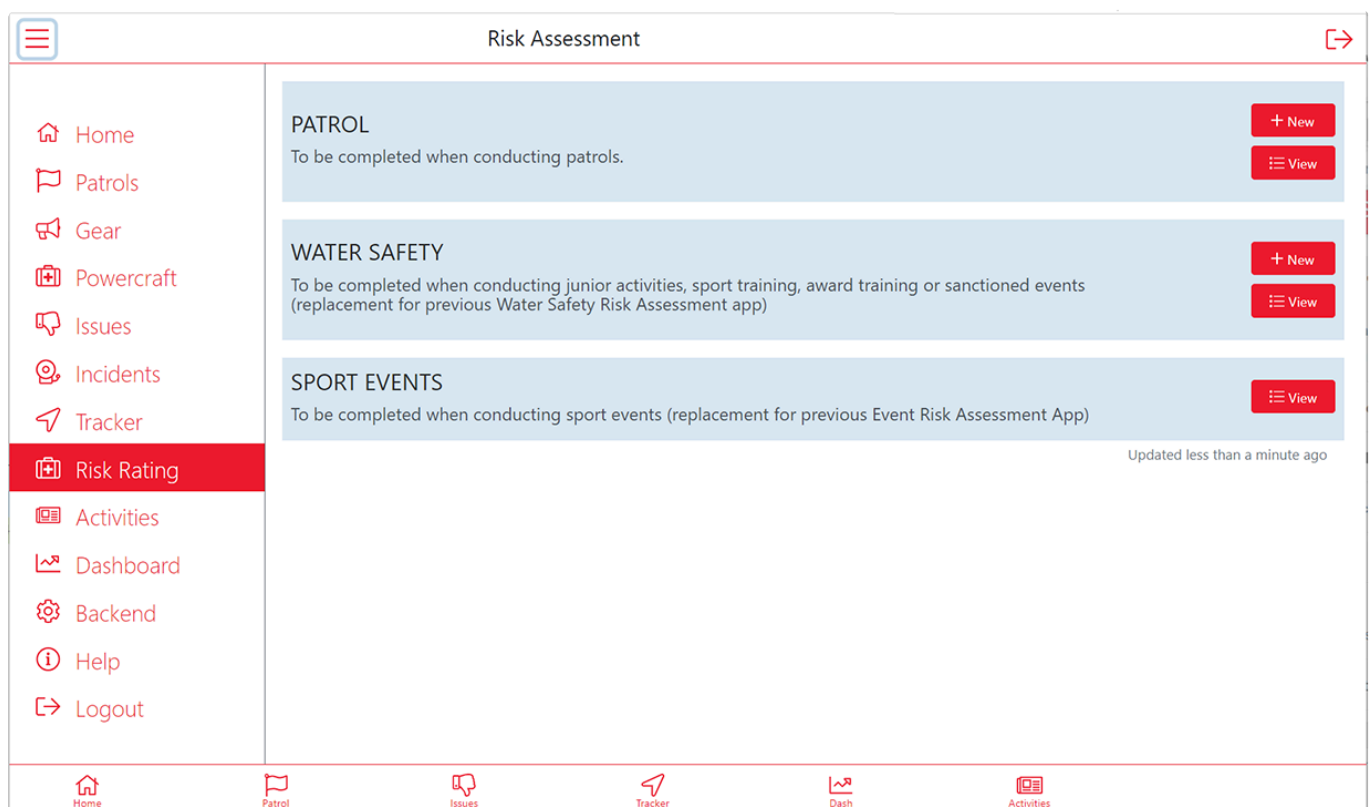

The Surf Risk Rating Tool offers qualified users several tools to assess the risk of the surf environment.

- The **Patrol** option assists patrol captains and other beach managers to assess risks in their patrol aquatic environment.
- The **Water Safety** option allows Water Safety Supervisors, Trainers and other parties to assess risk when conducting sport and award training, junior activities and other sanctioned activities.
- The **Sport Events** options allow for risk assessments to be made both before and during a sports event, as well as collecting data on any incidents that may occur during the event.

The aims of the Surf Risk Rating Tool include:

- To enable water safety managers, officials and others to be advised of a Surf Risk Rating in a timely and efficient manner.
- To have a consistent process for the evaluation of a surf risk rating.
- To provide key decision makers with information to enable them to make informed decisions.
- To provide key prompts associated with safety and risk management.
- To enable officers to reduce level of risks levels through mitigation.
- To act as a tool for the collection of key data that may assist in determining future safety practices.

The Surf Risk Rating tool is accessed by opening the Operations App, selecting the 3 lines located at the top-left hand corner to display the menu and choosing **Risk Rating**.

10.1 Gaining Access

Gaining access to the Surf Risk Rating tool

To access the Surf Risk Rating tool in the Operations App you will be required to hold the *SRR App Access* award in SurfGuard.

This is typically awarded by completing the *Surf Risk Rating* course or module online.

The Surf Risk Rating eLearning module is also used by other SLSA eLearning courses, such as the Silver Medallion Patrol Captain courses.

Follow these steps to complete the necessary eLearning :

1. Login to Members Area and progress into the eLearning system
2. From the 'Training Library' locate the SLS Surf Risk Rating course and Click ENROL (this course is free)
3. Once you have completed the eLearning course the 'SRR App Access' award will be allocated to you.

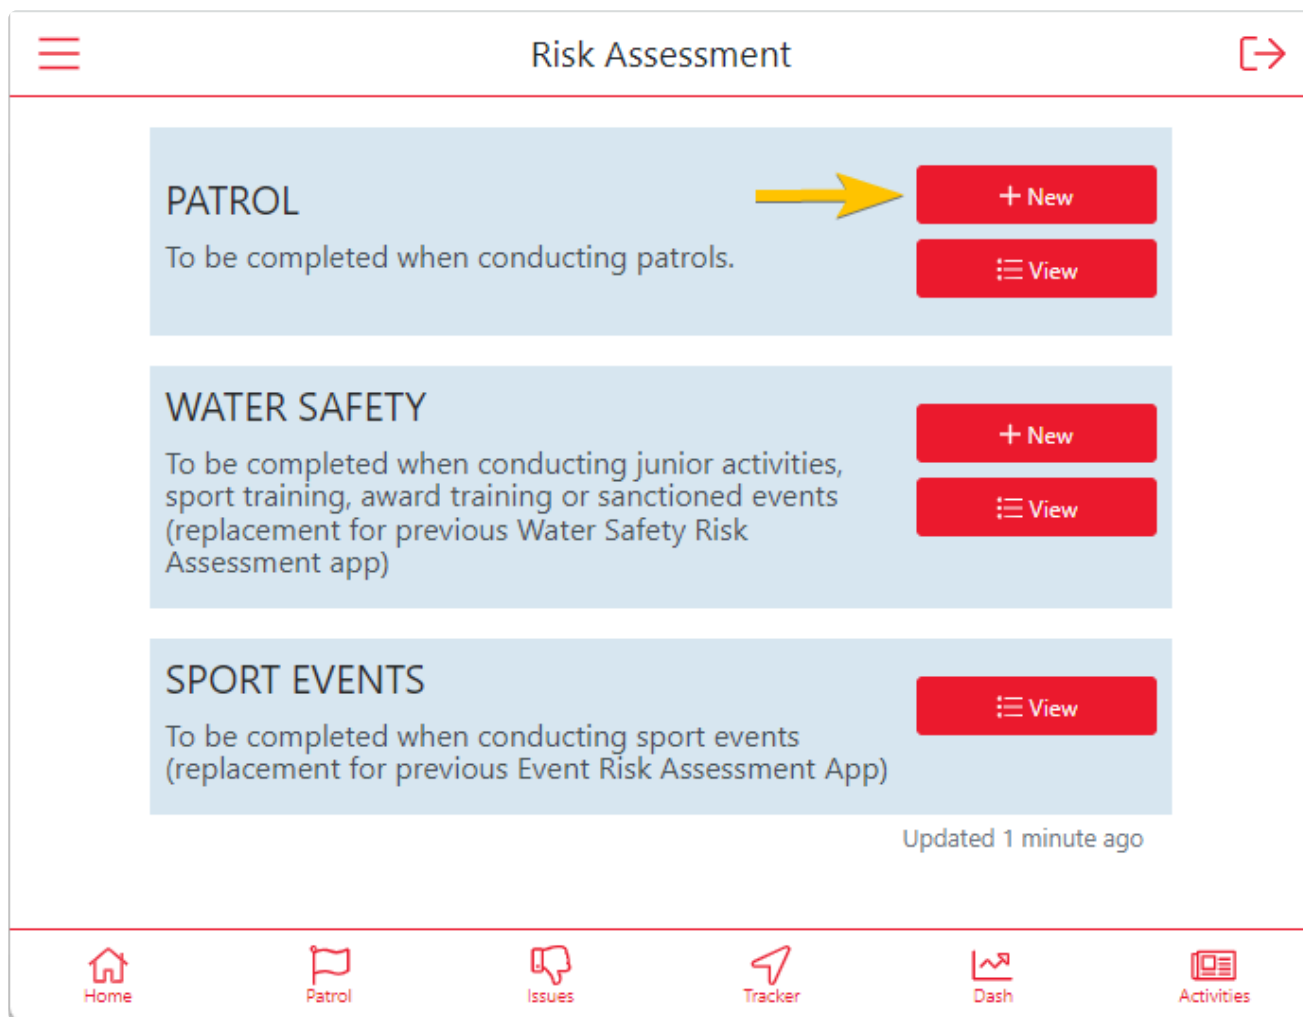

NOTE: You may not get immediate access to the Surf Risk Rating tool in the Operations App after completing the eLearning. You will need to wait until the weekly sync between SurfGuard and the Operations App occurs.

10.2 Patrol

Creating a Patrol Risk Assessment

The Patrol Risk Assessment assists users to risk assess their patrol aquatic environment.

Select the **+ New** button in the Patrol Section to create a Patrol Risk Assessment

1. Select the beach you wish to perform a Risk Assessment on.
The drop-down menu will display beaches within a 5 KM radius of your location.
If you are conducting patrols in flat water, see the [Flat Water Activities](#) topic for information on how to create a risk assessment for this environment.
2. Select the type of patrol you are conducting the risk assessment for.
3. Weather data can be pre-filled in some fields using the feed from BOM for the given beach.
Click on the **Auto** button to load data. All weather fields are compulsory and must be filled in to complete a Risk Assessment.

Note: The SRR Tool utilises information provided by the Bureau of Meteorology (BOM). If you have

allowed the Operations App to access your location settings, it can populate the weather data using 'real-time' data supplied by the BOM. If you have not allowed access to location services, you must manually input weather data.

If the app has automatically populated weather data and you do not believe it reflects the current conditions, you can manually override it.

10.3 Water Safety

Creating a Water Safety Risk Assessment

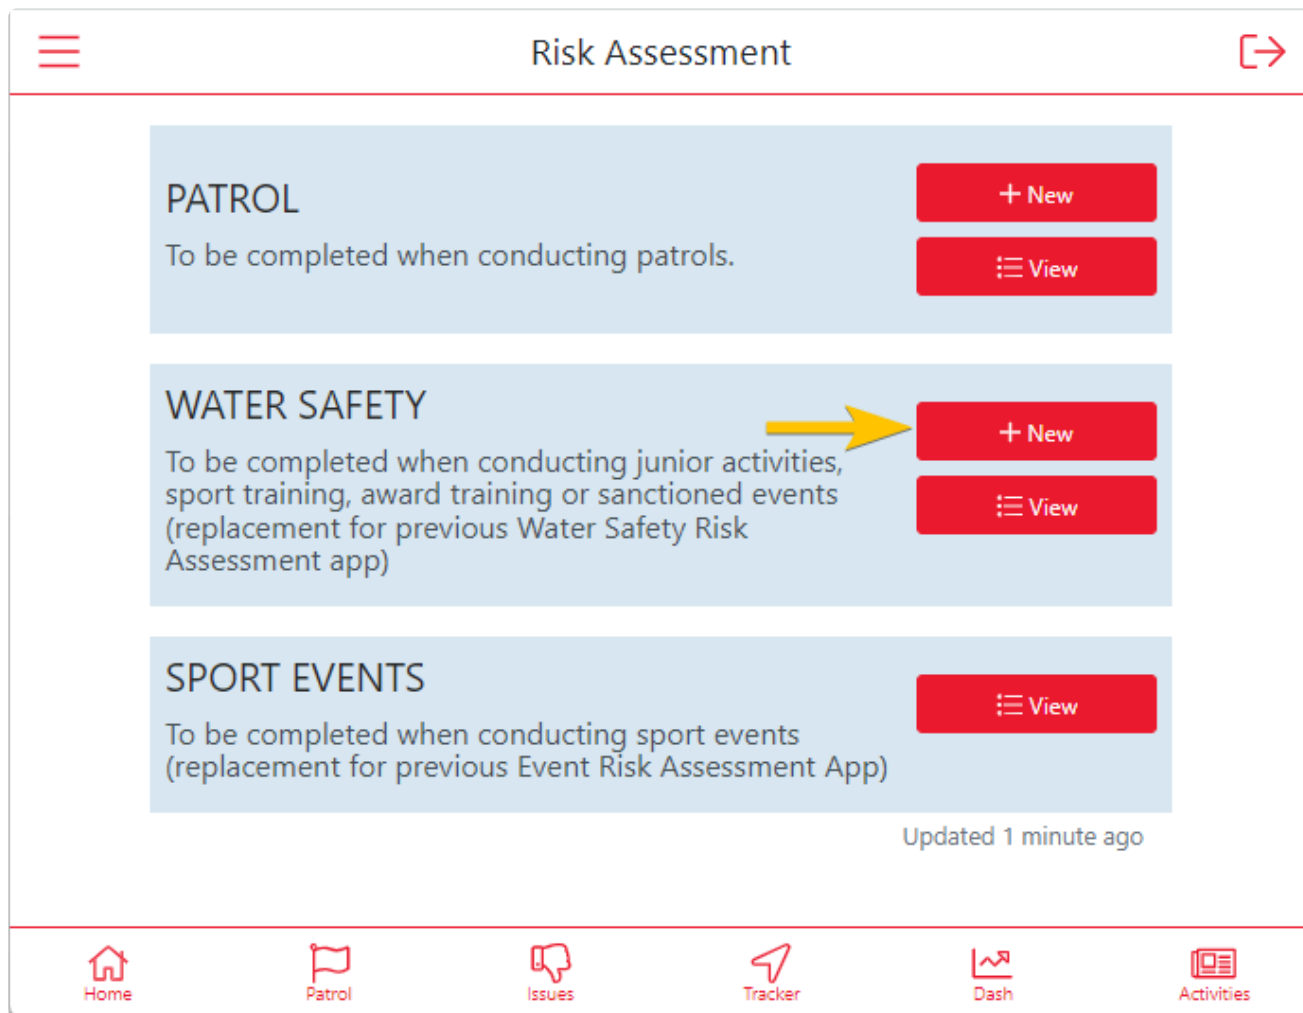

The Water Safety Risk Assessment assists users to risk assess their aquatic training activities, including

- Junior activities
- Sport training

- Award Training
- Other sanctioned events

It replaces the previous Water Safety Risk Assessment App.

Select the **+ New** button in the Water Safety section to create a Water Safety Risk Assessment

1. Select the number of qualified (SRC or Bronze Medallion holders) and unqualified participants for the activity. Do not include your water safety personnel in these numbers.
2. Indicate whether a patrol is currently signed on in your location.
3. Weather data can be pre-filled in some fields using the feed from BOM for the given beach. Click on the **Auto** button to load data. All weather fields are compulsory and must be filled in to complete a Risk Assessment.

Note: The SRR Tool utilises information provided by the Bureau of Meteorology (BOM). If you have allowed the Operations App to access your location settings, it can populate the weather data using 'real-time' data supplied by the BOM. If you have not allowed access to location services, you must manually input weather data.

Page 43 of 74

If the app has automatically populated weather data and you do not believe it reflects the current conditions, you can manually override it.

10.4.1 Sport Events – Initial & On-going

Performing an Initial Risk Assessment

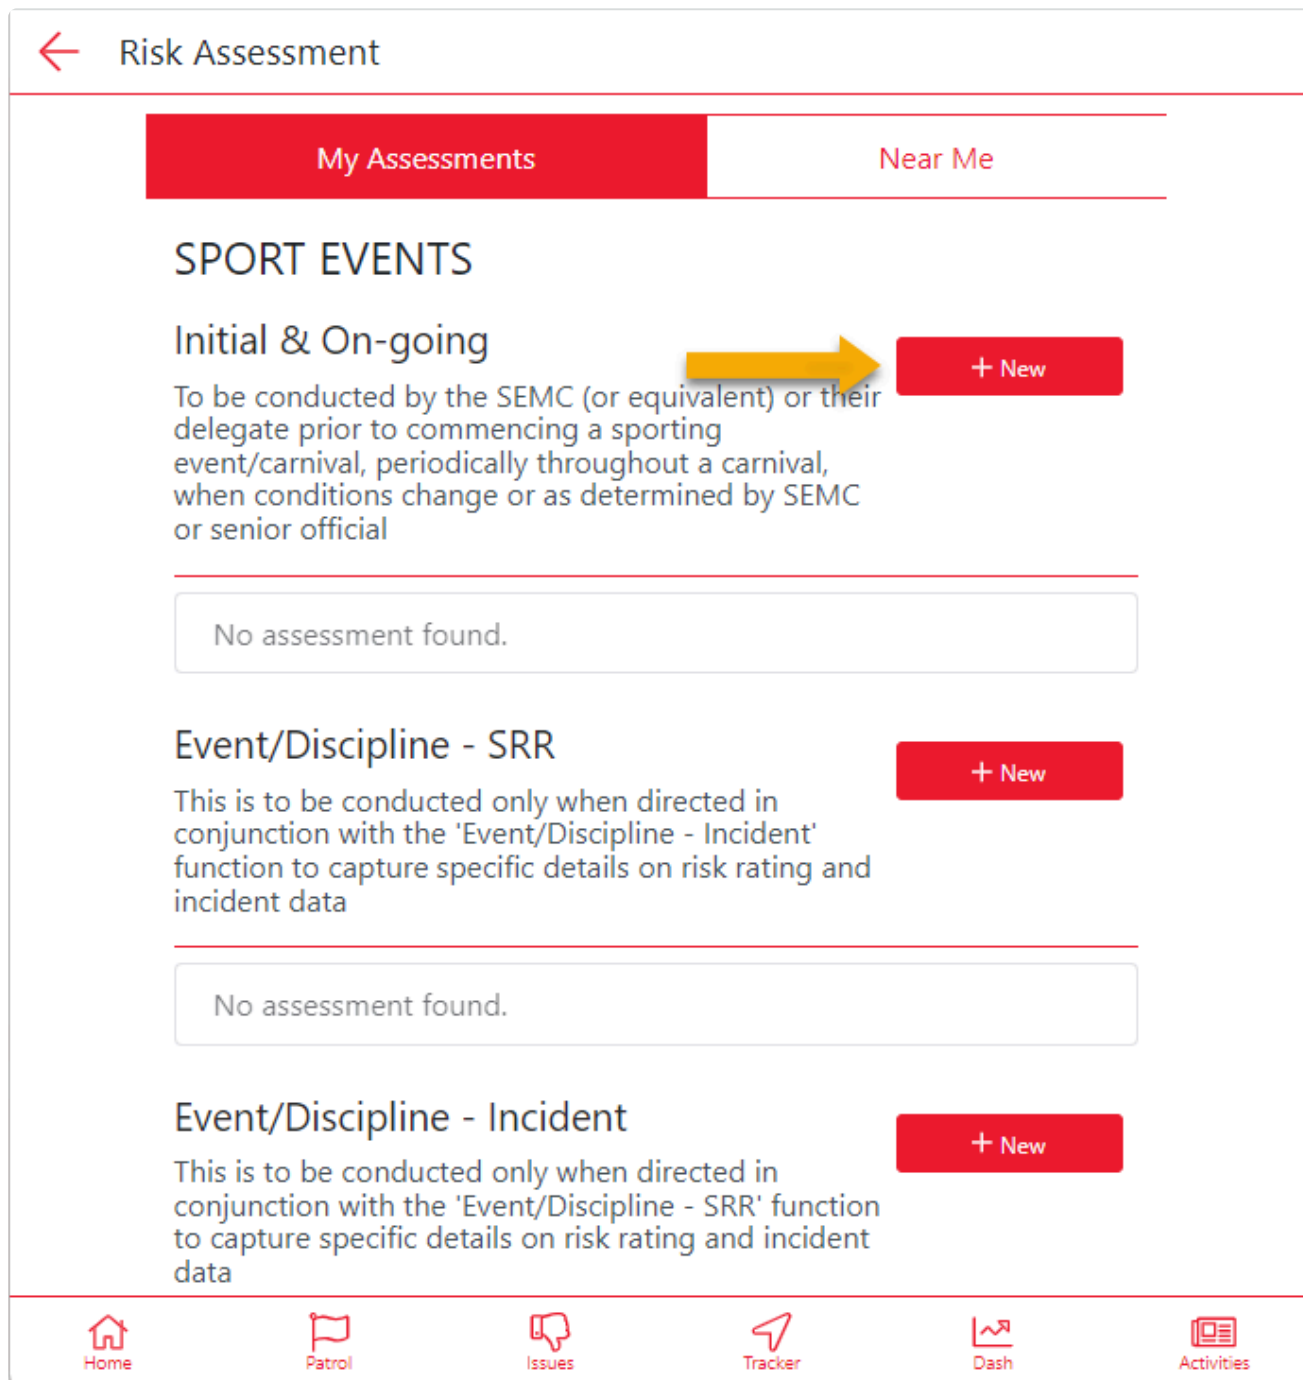

Sport Events (Initial & On-going) is used to determine the risk rating for the event as an overview. This can be conducted as many times during the day as required.

SRR is a reflection of the most hazardous observations of the surf characteristics

- Measured over a given time period (approx. 20-30 minutes).
- Measured ON the Beach

Note: It is better to err on the side of safety than to risk the chances of a serious under-estimation of a hazard's potential. Always defer to the higher rating if unsure.

On the Sport Events Screen select the red +New button for **Initial & On-going**

Select the beach you wish to perform a Risk Assessment on.

The drop-down menu will display beaches within a 5 KM radius of your location.

Select the arena that you are performing the Surf Risk Rating.

The drop-down menu will display the standard carnival areas along with 'other' options.

Note: The SRR app, utilises information provided by the Bureau of Meteorology (BOM). If you have allowed the app to access our location settings, you can simply click "auto" and the app will automatically populate the weather data using 'real-time' data as supplied by the BOM.

If you have not allowed access to location services, you may manually input weather data. Similarly, if the app has automatically populated weather data and you do not believe it reflects the current conditions, you can manually override it.

Click on the **Auto** button to load data. Fields marked as red are compulsory and must be filled in to complete a Risk Assessment.

The Risk Assessment can be reviewed later by selecting the assessment from the home screen.

10.4.2 Event/Discipline – SRR

* Performing a Risk Rating for a specific Surf Event

Event/Discipline data is similar to Initial & On-going, however it requires the 'conditions data' to be populated when competitors are both on the way out and on the way in from their race. It determines a rating level for athletes heading out and returning to shore and is also 'discipline specific'.

Select the **+New** button to create a new Risk Assessment (within the SRR – Sports Events section)

Use the drop-down menu for each option to specify the event you wish to create a Risk Assessment for. The drop-down menu for beaches will display beaches within a 5 KM radius of your location.

 Event Specific SRR
