Visual Classrooms

Visual Classrooms is a cloud-based discussion and collaboration platform designed to improve student engagement and support interactive learning and adaptive instruction in blended and online environments. Our web-based digital whiteboard encourages students to quickly capture, share, analyze, and improve their ideas together. The visually driven environment engages students of all learning styles, developing critical problem-solving, critical thinking, and teamwork skills.

Our tools combine the social learning pedagogies needed to transform teaching and learning with technologies that support a student-centered focus and an emphasis on peer interactivity and collaboration. Visual Classrooms provides continuous feedback and embedded analytics that help educators personalize learning and ensure that no one falls through the cracks.

For quick instructions on how to get started after [creating an account](#), check out this PDF titled [Creating Your First Activity](#). For more detailed information on all the features Visual Classrooms has to offer, continue reading this manual.

[Accessing Visual Classrooms >>](#)

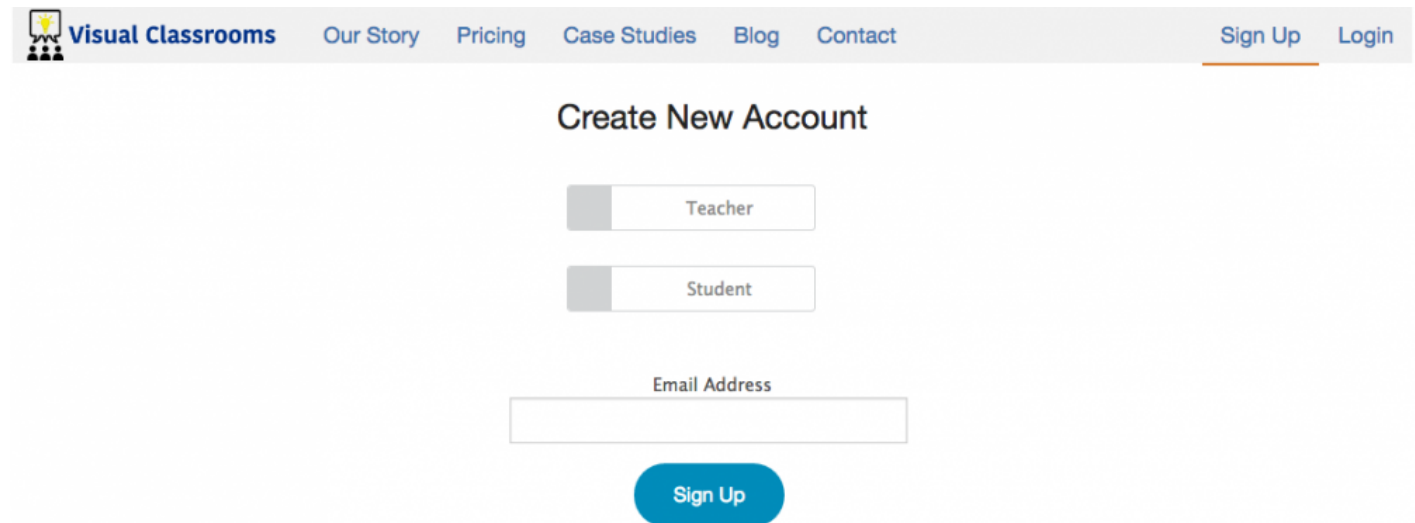

Accessing Visual Classrooms

Visual Classrooms is designed for use in both blended and online learning. All you need is an internet enabled device – a laptop, phone, tablet, or iPad.

There are two ways to access Visual Classrooms: [directly from the Visual Classrooms website](#) or [through your institution's learning management system](#). We have included instructions for both options in the next sections of this manual.

Direct Access to Visual Classrooms via Visualclassrooms.com

[Direct Access](#) accounts in Visual Classrooms are free. All you need to do is sign up for on our [website](#) for a TEACHER Account.

The screenshot shows the 'Create New Account' form on the Visual Classrooms website. At the top is a navigation bar with the Visual Classrooms logo and links for 'Our Story', 'Pricing', 'Case Studies', 'Blog', 'Contact', 'Sign Up' (highlighted with an orange underline), and 'Login'. The form itself has the title 'Create New Account' and two radio button options: 'Teacher' and 'Student'. Below these is a text input field labeled 'Email Address'. At the bottom of the form is a blue 'Sign Up' button.

Select ☒ **Teacher** and enter a valid email address.

Once you have signed up, you'll receive a temporary password via email. Then you're ready to start creating a wide variety of engaging activities – homework, labs, discussions and much more.

Students*

Student accounts require a subscription, as detailed on our pricing page. Many institutions will purchase student subscriptions in bulk and distribute an "Access Code" that allows students to join Visual Classrooms for free. Please send us an email at support@visualclassrooms.com if you want to discuss this option.

Students can also purchase a one year subscription with a credit card.

Both methods are explained in the following video:

Access Through an LMS

[LMS Access](#) your institution has a Learning Management System (LMS) like Blackboard or Canvas, Visual Classrooms can be integrated seamlessly as a tool within that system. Instructors and IT administrators need to contact us at support@visualclassrooms.com to get the launch url, secret, and key to enable LMS integration.

Much of the sign up process is automated, and if your school purchases student licenses, they are automatically applied to student accounts as they sign up.

Getting Started With Visual Classrooms using Blackboard

Instructions for integrating Visual Classrooms with Blackboard can be found [here](#). You can also watch the following short video.

Getting Started with Visual Classrooms using Canvas

Instructions for using Visual Classrooms with Canvas can be found [here](#). You can also watch the following short video.

**Students**

Student accounts require a subscription, as detailed on our pricing page. Many institutions will purchase student subscriptions in bulk and distribute an “Access Code” that allows students to join Visual Classrooms free of charge through their Learning Management System.. Please send us an email at support@visualclasrooms.com if you want to discuss this option.

Students can also purchase a one year subscription with a credit card.

Both methods are explained in the following video:

3. Create a title for your new activity.

4. Optional: Add a short description that will be visible to users. This could be anything from additional instructions to reminders to explain answers.

5. Optional: Add private notes or an attachment about the lesson. These notes and documents are not visible to students.

6. Select the [Create](#) button and your new activity will be created.

[<< Visual Classrooms Activities](#)[Adding Prompts >>](#)

The next step is adding the content to your activity – what we call “prompts” to guide students. The next sections will explain how to add various forms of content from text to videos to simulations and much more.

Adding Prompts

Activities in Visual Classrooms are made up of a series of what we call “prompts”. Prompts are instructions to guide students through the activity.

Here's how to add a new prompt to your activity.

1. To add a new prompt to your activity, select the  button.
2. You can then assign your new prompt a title and body.
3. Additionally, you can add customizing to your prompt's format, customize the visibility of the prompt, add tags, and add a sketch background.
4. To add your new prompt, select the  button.

Prompt Visibility Settings

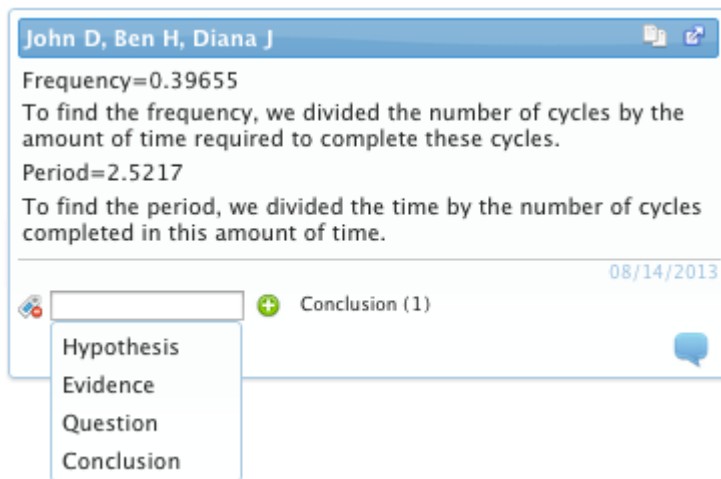

Unlike other collaboration tools, you can adjust when students see each others posts to prompts using the visibility settings.

There are three options: .

-  **Show All** – All student posts are visible at all times
-  **After Post** – Students answers are hidden until AFTER a user posts an idea. Once they post their idea, other responses become visible.
-  **Hide** – Users will only see their response, not anyone else.

Knowledge Tags

Knowledge Tags (or “tags”) are labels that enable students to categorize posts using simple keywords. Tags can be used in a variety of ways – conceptual knowledge tags describe procedures, lessons learned, underlying concepts and reflections that are related to the ideas being expressed. Tags can also be used to answer multiple choice questions, express levels of understanding of others ideas or reference others ideas, and they can be used to indicate agreement (“thumbs up”). Tags make it easier to find and track ideas. In Visual Classrooms, users can choose from a list of pre-determined tags set by the instructor or they can add their own.

Here you will see how to create your own tags.

1. Make sure you have enabled tagging by checking the **Enable Tagging** box.

2. Select the **Default Tags** button.

3. Type in what you want to call your tag.

4. Click the  button to add your new tag.

- Repeat this process if you would like to add more tags.

Hypothesis * Evidence * Question * Conclusion * Default Tags

Adding a Sketch Background

Our Sketch Tool allows both instructors and students to add a background that students can draw on. For example, if you students to create a graph or free body diagram you can add graph paper or a free body diagram template as your sketch background.

Here's the process of adding a background image to the sketch tool:

Sketch Background

Upload

[Preview in Sketch](#)

- First, select the **Upload** button.

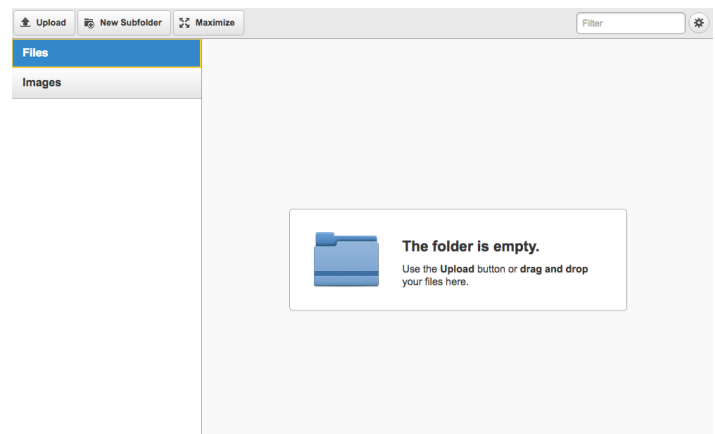

- You will then see a pop up window with folders on the left. If it is your first time, create a new folder just for you. You can do this by right clicking on a folder and selecting "New Subfolder".

- To upload the image to our server, select the

button. The ideal height/width is 500 (h) x 800 (w).

- After the image has been upload, double click on the image. It will then be selected for the background of the sketch.

[<< Creating a New Activity](#)

[Editing an Activity >>](#)

You can preview the image by clicking on “Preview in Sketch”

Editing an Activity

It's easy to edit your activity. Please note that editing an activity will change that activity for all of the groups that it is assigned to.

To edit an activity, select the  button in the Activities tab. Here, you can activate a session and add a new prompt. To view the process of adding a new prompt, see [Adding a New Prompt](#).

You can organize prompts.

Activating a Session

To make an activity visible to a group, you will need to assign that particular activity to a group. There are two ways you can do this: directly from the activity's page or from the **Sessions** tab in the **Teacher Dashboard**'s drop down menu. Here, you will learn how to activate a session from the activity's page. To find instructions for the other way, see [Creating a New Session](#).

1. Click the  button under **Existing Sessions**.
2. Select the group you want to assign the activity to, whether students can work as individuals or in small groups, and the date you would like the session to activate using the drop down menus. The activity will not be visible to students until it is activated.

A screenshot of a 'New Session' dialog box. The dialog has a title bar with a close button (X) in the top right corner. The main content area is white with a light gray border. It contains the following fields: 'Acids and Bases' (text), 'Group' (text) with a dropdown menu showing 'Honors Chemistry - 2nd Period', 'Students Work As' (text) with a dropdown menu showing 'Individuals' and a blue 'help' link, and 'Class Date' (text) with a date input field showing '2016-09-12'. At the bottom is a green 'Save' button.

[Using the Text Editor >>](#)

Here, you can learn how to use the different features of the text editor for everything from prompts to activities.

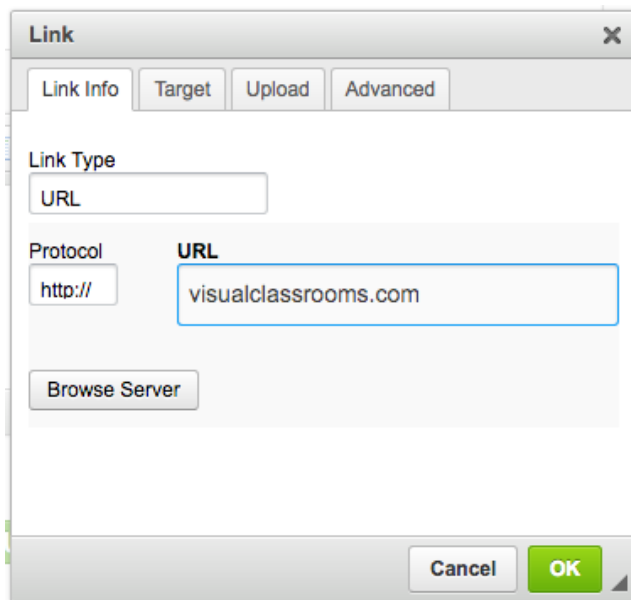

Adding Text

Click within the text editor and begin typing.

Adding a Link

Here you will learn how to add a link.

1. Highlight the text that you would like to lead to a link, and click the  button. Then, paste your link in the **URL** box.

The screenshot shows a 'Link' dialog box with the following elements:

- Tabbed interface with 'Link Info', 'Target', 'Upload', and 'Advanced' tabs. 'Link Info' is selected.
- 'Link Type' dropdown menu set to 'URL'.
- 'Protocol' input field containing 'http://'.
- 'URL' input field containing 'visualclassrooms.com'.
- 'Browse Server' button.
- 'Cancel' and 'OK' buttons at the bottom right.

2. Click the  button, then  .

Adding a Document

Here you will learn how to add a document.

1. Click the  button.
2. Select the **Upload** tab.

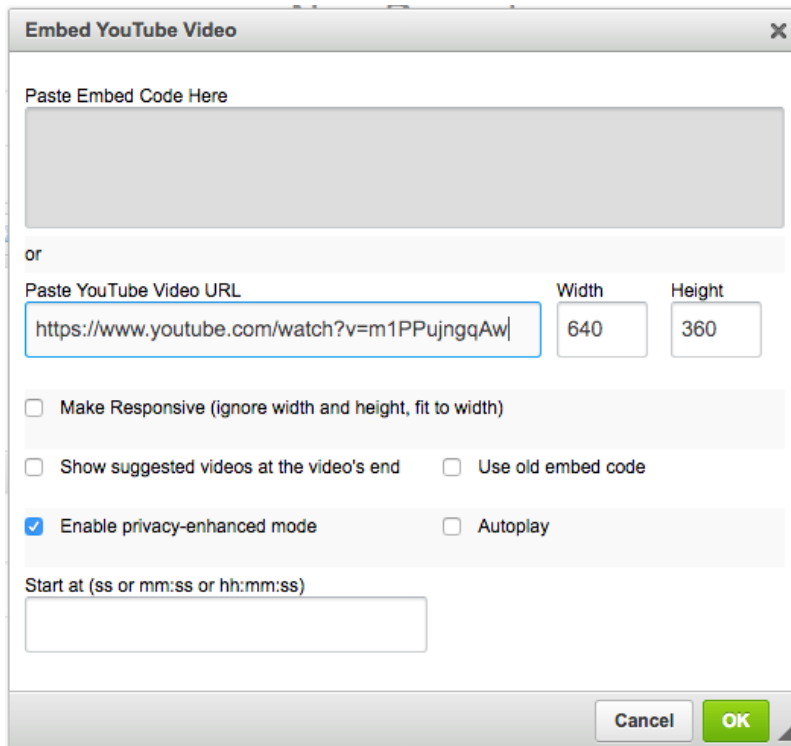

3. Choose the file you would like to upload from your computer.
4. Click the  button.
5. Click the  button, then .

Embedding a YouTube Video

Here you will learn how to embed a YouTube video.

1. Click the  button.
2. Paste the URL of your YouTube video into the text box.

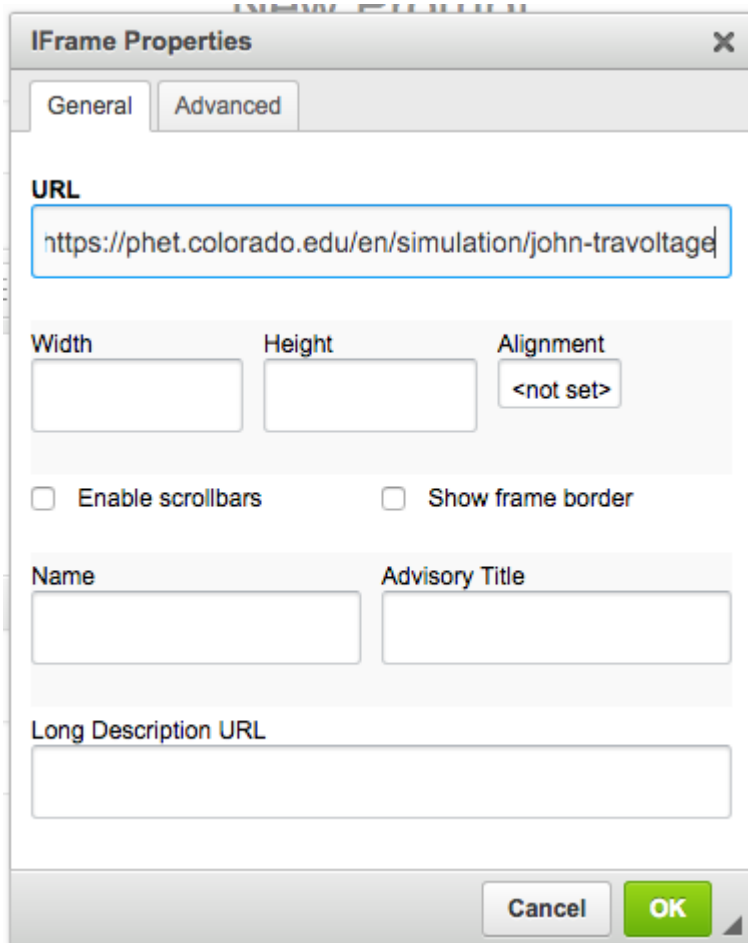

The dialog box is titled "Embed YouTube Video" and has a close button (X) in the top right corner. It contains a large text area labeled "Paste Embed Code Here". Below this, the word "or" is displayed. Under "or", there is a section for "Paste YouTube Video URL" with a text box containing the URL "https://www.youtube.com/watch?v=m1PPujngqAw". To the right of the URL text box are two input fields: "Width" with the value "640" and "Height" with the value "360". Below these fields are four checkboxes: "Make Responsive (ignore width and height, fit to width)" (unchecked), "Show suggested videos at the video's end" (unchecked), "Enable privacy-enhanced mode" (checked), and "Use old embed code" (unchecked). Below the checkboxes is a label "Start at (ss or mm:ss or hh:mm:ss)" followed by an empty text box. At the bottom right of the dialog box are two buttons: "Cancel" and "OK".

3. Click the  button, then .

Adding an iFrame

An iFrame embeds an HTML page into the current page. You can use this feature for many different things, such as embedding [PhET simulations](https://phet.colorado.edu/en/simulation/john-travoltage). Here you will learn how to add an iFrame.

1. Click the  button.
2. Paste the URL of the website you would like to embed into the text box. You can also set the **Width** and **Height** of the embedded website.

3. Click the  button, then .

Collaborating on Activities

Teachers can collaborate on activities.

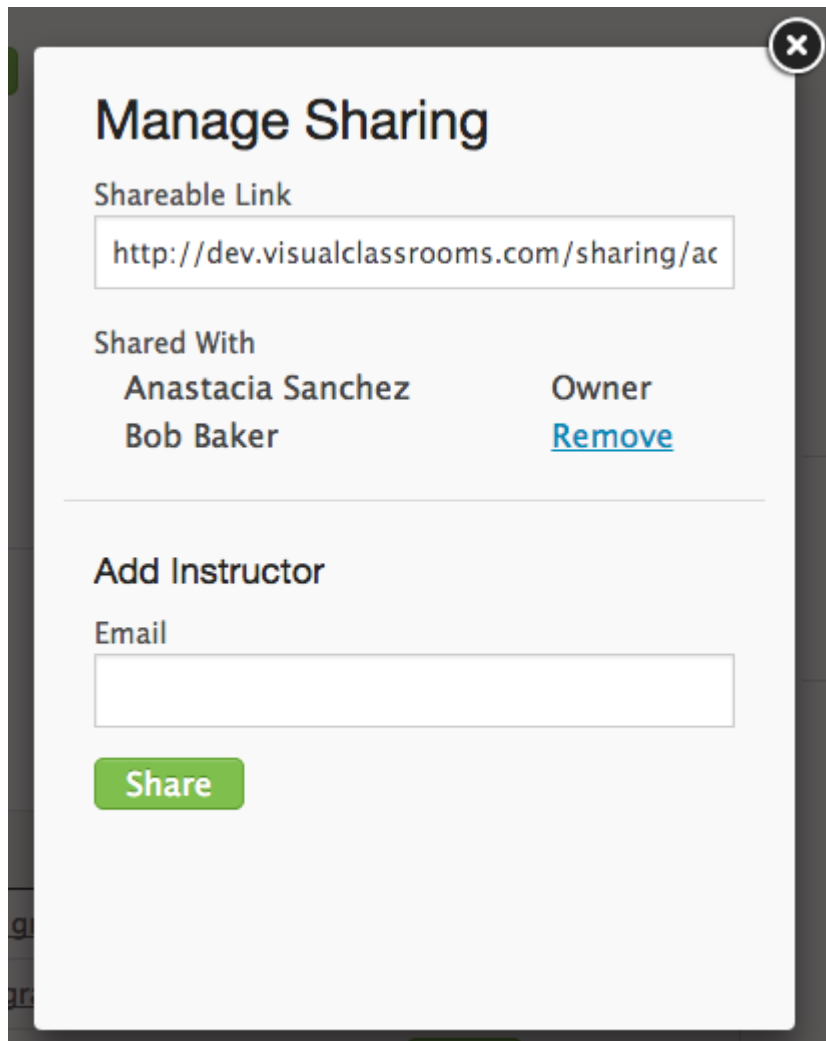

Sharing an Activity

1. Go to **Activities**, and select the activity you would like to share.
2. Find **Share** on the right and click the underlined blue link.

Share

Shared with [1 Instructors](#)

3. At this point, you can send the shareable link to another teacher, or add their email.

The image shows a 'Manage Sharing' dialog box with a close button (X) in the top right corner. It contains a 'Shareable Link' field with the URL 'http://dev.visualclassrooms.com/sharing/ac'. Below this is a 'Shared With' section listing 'Anastacia Sanchez' and 'Bob Baker', with an 'Owner' label and a blue 'Remove' link. A horizontal line separates this from the 'Add Instructor' section, which has an 'Email' label and an empty text input field. At the bottom is a green 'Share' button.

4. Click the  button.

Rubric Builder

In an activity, you can build a rubric. You can access the **Rubric Builder** by clicking the button.

A green rectangular button with the text "Edit Rubric" in white.

To begin, click **Add New Condition**. You will then be prompted to select from pre-made conditions: total posts, new ideas, total responses, tags, saved arrangements, characters, files attached, viewed image, and page load. Descriptions of these conditions can be found in the  [Glossary](#) at the top of the page.

After you have chosen a condition, set the minimum amount a student must reach for that condition, and the grade that student would receive. Press the  button to continue assigning minimum values to different grades. The program will automatically grade according to your conditions. You can continue to add different conditions afterwards.

Once you are finished creating your rubric, save the rubric to your activity.

Visual Classrooms Sessions

Visual Classrooms Sessions are activities that have been assigned to a group. A teacher can assign the same Visual Classrooms Activity (i.e. Newtons Second Law Homework) to multiple groups (i.e. Tues – Thursday and 1pm Mon-Wed-Fri). Each combination of an activity and group is a separate session, meaning the Tues-Thursday section doesn't see what Mon-Wed-Fri section is doing, even though they are working on the same activity.

Creating a New Session

[Creating a New Session](#) create a new session, click on “Sessions” in the Teacher Dashboard dropdown menu.

You will see a page similar to this.

The Session Information page includes links to the session both via the internet and the Learning Management System.

Student Notebook

The “Student Notebook” feature allows users to create a private workspace that only they and their teacher can see. It can be used as a scratchpad to formulate ideas and then move them to the collaboration space. As well the Student Notebook includes all of your answers across all of the prompts in an activity.

1. To access your Notebook, select the  icon on a session's page.
2. Your Notebook will display all of the ideas that you have posted on the prompts in this activity.
3. Additionally, you can create a new idea in your Notebook and assign it to a prompt, where it will be posted. Unless this new idea is assigned to a prompt, it is only visible to you.
4. Teachers can view the notebooks created by all students in their classes.

[<< Creating a New Session](#)

[Visual Analytics >>](#)

Visual Analytics

The Visual Analytics function provides visualizations of data about activity and interactions taking place in a session. The visualizations are displayed in two ways. The first being an activity matrix, and the second, a word cloud.

Activity Matrix

The activity matrix displays prompts in the columns and group members and/or an individual member in each row. The instructor will be listed in a row as well. A green dot represents a new idea, a blue dot represents a response to someone elses idea, and a yellow dot represents an additions to your own idea – what we call “idea improvement”,

Word Cloud

The word cloud that displays frequently used words as larger and slightly faded in color. Words used less frequently are smaller and darker.

[<< Student Notebook](#)[List View >>](#)

List View

The List View provides a list of posts by user/user group or prompt.

Collections

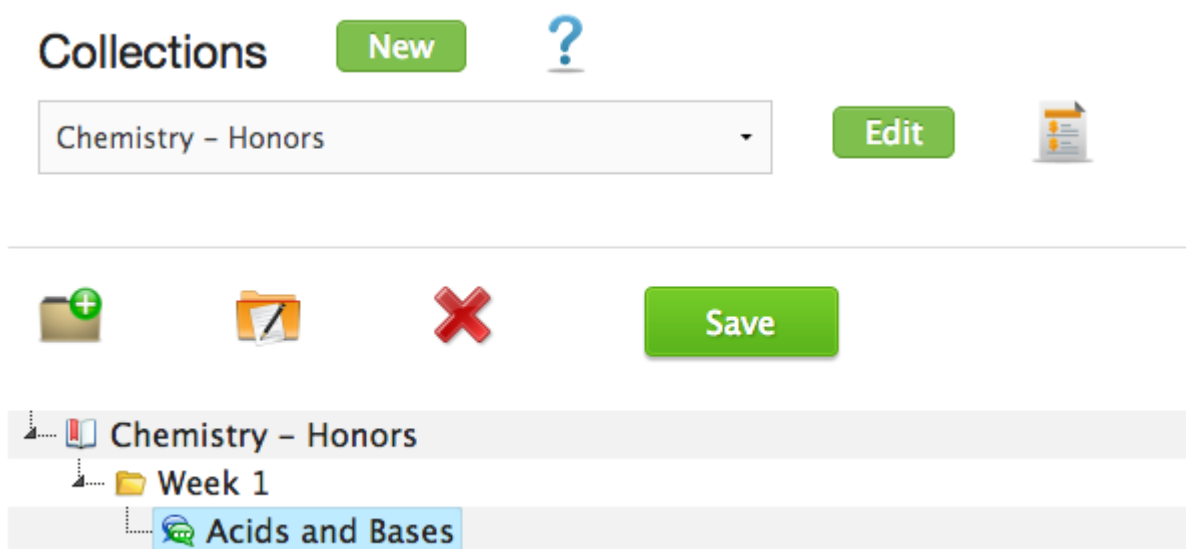

Collections are a way to organize your activities into a curriculum. You can organize these activities in any way you want. Some ways might include by week, topic, or chapter by book.

To add a new collection, click the  button. You will be prompted to give a title and description to your new collection.

Once your new collection has been created, add activities from the right of your screen by dragging it into your collection on the left of your screen. You can also create folders within your collection. Just select your

collection so that it is highlighted in blue, then click the  button. You can name (and re-name) your folder with the  button and remove it from your collection with the  button.

Click the  button to finish your work.

The screenshot displays the 'Collections' management interface. At the top, there is a header with the word 'Collections', a green 'New' button, and a blue question mark icon. Below this is a dropdown menu currently showing 'Chemistry - Honors', followed by a green 'Edit' button and a document icon. A horizontal line separates this header from the action buttons below: a folder with a plus icon, a folder icon, a red 'X' icon, and a green 'Save' button. At the bottom, a tree view shows the collection structure: 'Chemistry - Honors' is the root, containing a folder 'Week 1', which in turn contains a folder 'Acids and Bases'. The 'Acids and Bases' folder is highlighted with a blue background.

Community

You can access activities shared either by the Visual Classrooms community around the world, or you can share activities with a private community related to your school.

As of now, you can't create your own institutional community.

Using Visual Classrooms

Visual Classrooms offers a variety of collaborative learning activities.

The activity page provides an overview of the prompts for each Visual Classrooms session, as well as the notebook page, visual analytics pages, and a list view page. This page also contains a “sparkline” visualization that displays where the action is happening – the number of posts and responses to a prompt by both the teacher and the students.

Screen capture of activity page and various elements associated with that page.

Participating in an Activity

Prompts in an activity are questions or challenges posed by the teacher that can be responded to by individual students, groups of students, and the teacher. To learn how to add a prompt, see [Adding a New Prompt](#).

You can select a prompt within a session by clicking on the blue underlined text in each box. In the example below, the blue underlined text would be **Introduction to Conservation of Energy**.

[Introduction to Conservation of Energy](#)  

Watch the video which will introduce you the the basics of "Conservation of Energy". Post a question you have about this topic or about something...

04/14/2016

Selecting a prompt will take you to that particular prompt's page.

You can add a response to a prompt and collaborate with your peers by clicking the  button. For a more in depth explanation of all the features you can use when writing your idea, see [Creating a New Idea](#).

Creating a New Idea

A “new idea” is like a post-it note where you can contribute your ideas. You can add a new idea in many different ways: typing text, uploading a file, taking a picture or making a video with a webcam, and creating a sketch with our sketch tool. Each of these are described in the sections that follow.

Everyone’s ideas will be posted and visible on Visual Classroom’s collaboration space..

To add an idea in response to a prompt, click the  button.

Your idea will appear on the Visual Classrooms whiteboard.

The refresh button  at the top right of the page will retrieve the latest posts.

Adding a Video to a New Idea

Here you will see the process of adding a video to a new idea.

1. To begin making a video, select the Video icon  under **Attach Media**.

2. You will be able to see a **Live Feed** and **Preview**. When you are ready, click the

Start Recording

button.

3. You can also

Pause

or

Start Over

4. If you are satisfied with your video, select the

Attach To Post

button.

5. After selecting to upload your image, you will see your video at the bottom of the **Add Idea** box.

Submit

6. Select the button to post your new video.

7. Your video will then be visible on the Prompts Page.

Responding To and Tagging Ideas

Responding To Ideas

Here you will see the process of responding to others' ideas.

1. To respond to the idea of a classmate or classmates, simply click the  button in the bottom right of the desired Idea Box.

2. You will then see the idea of your classmate or classmates at the top of a new idea box. You may respond with text, an uploaded file, a webcam image, a sketch, and/or a pasted image.

3. When your response is complete, select the  button.

4. Your response will then be visible on the Prompts page.

Tagging Ideas

Knowledge Tags allow users to create and manage labels (or “tags”) that categorize their ideas using simple keywords. Tags can be used in a variety of ways – conceptual knowledge tags describe procedures, lessons learned, and reflections that are related to the ideas being expressed. Tags can be used to answer multiple choice questions, express levels of understanding of other’s ideas, and reference other’s ideas. They also make it easier to find and track ideas. In InterLACE, users can choose from a list of pre-determined tags and also add their own.

John D, Ben H, Diana J

Frequency=0.39655
To find the frequency, we divided the number of cycles by the amount of time required to complete these cycles.
Period=2.5217
To find the period, we divided the time by the number of cycles completed in this amount of time.

Highlighting and Comparing Ideas

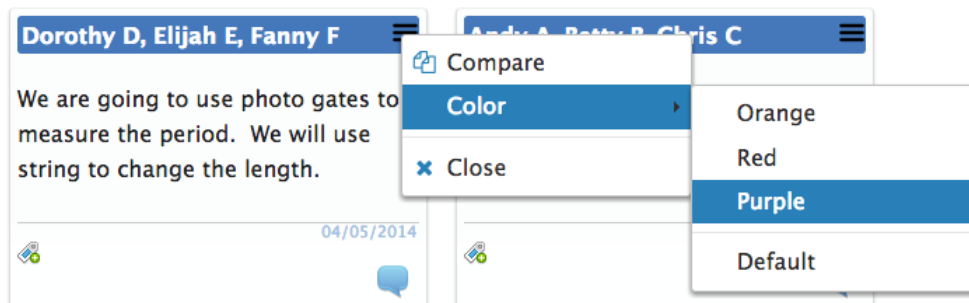

The compare and highlight features – indicated by icons on the upper left hand corner of **New Idea** – allows users to enlarge one or two ideas to discuss.

Highlighting Ideas

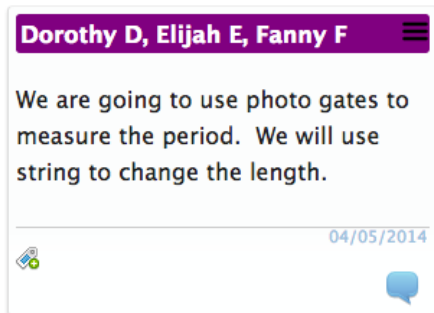

Here you will see the process of highlighting ideas.

1. To highlight an idea, simply select the  icon in the top right corner of the Idea Box.

2. You can then choose from three different colors: orange, red, and purple. Select **Default** to set the idea back to normal.

Comparing Ideas

Here you will see the process of comparing two ideas.

1. To compare two ideas, first select the  icon in the top right corner of an idea, then the **Compare** button.

2. Do the same thing for the idea you would like to compare the first one to.

3. Your two ideas will then be compared side-by-side.

[<< Responding To and Tagging Ideas](#)

[Organizing Ideas >>](#)

Organizing Ideas

Users can individually and collaboratively arrange ideas to express relationships and connections. They can save their arrangements and annotate the arrangement with an explanation.

Rearranging the Layout

Arrange

1. Each box can be moved around to create logical groupings of ideas. To do this, simply select the blue bar at the top of the Idea Box that you would like to move and drag it to the desired location.

2. Select the  icon to save this arrangement for later use. Select the  icon to return back to the original automatic arrangement.

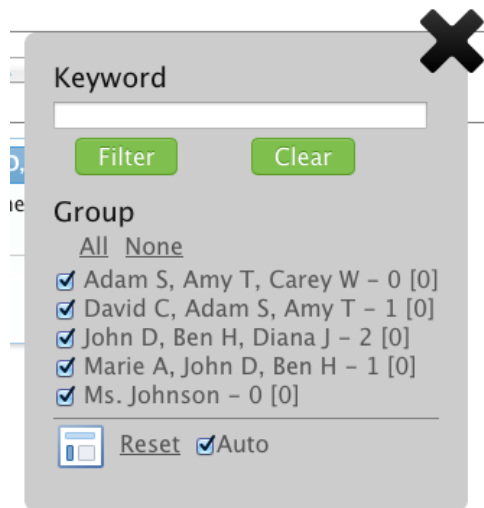

Display Options

Options

1. Select the  icon to see the Display Options.
2. With the Display Options, you can customize the font size of the text, choose the number of columns in which the ideas are presented, show/hide responses, display/hide names, show/hide the highlighting options.

Visual Classrooms Lingo

Visual Classrooms is an innovative computer-supported collaborative learning (CSCL) environment to enable a broad range of collaborative knowledge construction activities. It provides a shared interactive electronic white board where users can post, visualize, build on, reorganize, and comment on their own and/or others' ideas as they work together to solve problems or create solutions or knowledge. It supports collaboration by making it easy for users to recognize conflicting ideas, argue their position, negotiate meaning, think critically, and reflect on their work.

Using Visual Classrooms

- **Class Key:** Users need a “class key” which is a group password to join an activity. Join is the term used to indicate that users are entering an activity. You may join an activity as a single user, as a group, or you can rejoin as a member of an existing group.
- **New Idea:** In Visual Classrooms a “new idea” is like a post-it note that you can read or write down your ideas. You can add a new idea in many different ways – typing text, uploading a file, taking a picture with a webcam and making a sketch with our sketch tool. Each of these are described in the sections that follow. Everyone's ideas will be posted and visible on Visual Classrooms' public whiteboard.
- **Respond** allows users to respond to another user's new idea by adding a “sticky-note”.
- **Comparing and highlighting:** The compare and highlight features – indicated by icons on the upper left hand corner of new idea – allows users to designate and enlarge one or two ideas to discuss.
- The **Notebook** is a private workspace where users can develop ideas before publishing them to the public Visual Classrooms' collaboration whiteboard. The only people who can view a notebook are the owner (either an individual or a group of users) and his/her teacher.
- The **List View** provides a list of posts by user/user group or prompt. This is available for both teachers and end users.
- **Knowledge Tags** allow users to create and manage labels (or “tags”) that categorize their ideas using simple keywords. Tags can be used in a variety of ways – conceptual knowledge tags describe procedures, lessons learned, and reflections that are related to the ideas being expressed. Tags can be used to answer multiple choice questions, express levels of understanding of other's ideas, and

reference other's ideas. They also make it easier to find and track ideas. Users can choose from a list of pre-determined tags and also add their own.

- **Visual Analytics** is a page where teachers and students can see visualizations of data about activity and interactions taking place in Visual Classrooms. One visualization is a word cloud that displays frequently used words as larger and slightly faded in color. Words used less frequently are smaller and darker.
- **Organizing ideas:** Users can individually and collaboratively arrange ideas to express relationships and connections. They can save their arrangements and annotate the arrangement with an explanation.

Creating Activities

- **Teacher Dashboard:** The Teacher Dashboard is where teachers can create and manage activities, assign them to one or more groups, and view usage reports.
- An **Activity** is a based assignment – homework, lab, in-class discussion, review, etc. It includes a series of prompts – which are questions or challenges.
- The **Activities Tab** is where teachers create and manage your activities. This page is where you can create new activities, edit them, activate them for one or more user groups (e.g. you may want to assign an activity to multiple groups/classes/sections), duplicate activities (in order to reuse an activity from a prior year), and archive them.
- The **Activity Page** provides users with an overview of the prompts for an activity, as well as the notebook page, visual analytics pages, and a list view page. This page also contains a sparkline visualization that displays the number of posts and responses to a prompt by both the teacher and the students.
- **Prompts** are questions or challenges posed by the teachers that make up an activity.
- **The Groups Tab** allows teachers to can add new groups of users and manage existing groups. This can be done in two different ways – by typing in the group and user names or by uploading an Excel file with a list of the users first and last names. The system includes an excel template to support this function.
- **Sessions** are activities that have been assigned to a group.

Visual Classrooms on Mobile Devices

When using Visual Classrooms on mobile devices, there will be minor differences when adding or responding to an idea.

1. When adding text to an idea, the rich HTML editor is disabled.

2. The  and  buttons have identical functions, they will each access the Camera Roll. You can also take a picture or video.
3. The option to Copy/Paste an image is disabled.
4. When using small mobile devices (screen width ≤ 480 pixels), dragging/arranging is disabled.
